KERN – Tradition and Innovation for over 170 years

An independent family business, KERN since already 7 generations is synonymous with quality and reliability in customer service.

BALANCES & TEST SERVICE
for laboratory, industry and food

fast

- 24 hours delivery service – ordered today, on its way tomorrow
- Sales & service hotline available from 8:00 am to 6:00 pm

reliable

- 3 years warranty for balances over € 400,–
- Precision in weighing technology for more than 170 years

competent

- DAkkS accreditation DIN EN ISO/IEC 17025
- Certified QM system DIN EN ISO 9001:2008
- Authorisation for initial verification by the manufacturer 2009/23/EC
- Medical certifications DIN EN ISO 13485 and 93/42/EEC

versatile

- One-stop shopping: from pocket balances through to floor scales – everything from one supplier
- Find the product you want at lightning speed with the "Balance Quick-Finder" at www.kern-sohn.com

PROFESSIONAL MEASURING

2016

How do I quickly find the product I am looking for?

The tried and tested quick search system – "Quick-Finder" ahead of each product group allows you to base the search for a certain target group on weighing data you need such as readout, weighing range and main features for each model.

And it's as simple as that – find the product you want in 2 steps:

1. Go to the product group index on page 3
2. Pick the appropriate product group and find the product you want using the Quick-Finder.

... or use the model name and find the product quickly and efficiently using the A-Z model list:

Touchscreen models KERN AET · PET · ILT · KEN · KET – State-of-the-art premium touchscreen balance series with the complete range of functions for demanding processes

Come and enjoy the many benefits of the innovative touchscreen models

- Large touch display for easy operation and convenient reading
- The menu and processes are self-explanatory
- Intuitive, graphically supported operation, by using Smartphones, tablets, etc.
- No more errors or lost time through keys which have several functions or unclear markings
- Ensures a more efficient and rapid operation
- Large keys, which can also be operated while wearing gloves
- Wide range of functions, software which can be customised to suit your individual requirements, vast database

KERN – Weighing can be this simple.

Features of the new touchscreen models KERN AET · PET · ILT · KEN · KET

Innovative touchscreen
Large backlit and touch-sensitive LCD screen with digit height 17 mm, screen size 5.7" (approx. 145 mm), WxH 115x86 mm. Dimensions of display device WxDxH 208x71x150 mm.

Electronic level indicator
permanently checking the position of the balance, sounding an alarm when the device is out of balance and giving visual instructions on how to correct this (not ILT-GM)

Convenient recipe-weighing
complete recipes with all recipe ingredients and associated nominal values, names, tolerances, tare weights etc. can be stored. If one recipe ingredient is overweight, then the practical recipe adjustment function for when dosages are exceeded automatically calculates the new target weights of the other ingredients. Recipes and their ingredients can be multiplied at will at the press of a button, which is ideal for the production of larger containers, bulk packs etc. (Multiplier function)

3 rapid assignment keys
for frequently recurring applications, functions, settings or memory contents

Alibi memory
Electronic archiving of weighing results, see also page 214

2 infrared sensors
to initiate functions such as TARE, zeroing, for carrying out, starting or aborting adjustment, calling up database or menu and much more, without having to touch the balance – just give it a wave!

Statistical function
for statistical analysis of series of measurements. The graphic display (only AET, PET) of measurements can be used by the operator to check and evaluate their results

Enormous database (up to 8 GB)
can be filled easily at the PC using the optional software KERN PET-A01 (suitable for KERN AET, PET) or KET-A04 (suitable for ILT-GAM, ILT-BAM, KET-TAM), for more details see page 184. Particularly beneficial when counting a large number of individual items, as part of a stock-tacking, for checkweighing, recording recipes etc.

Individual print formats
up to 16 printouts to be edited easily at the PC

High level of connectivity
• 1 x Ethernet
• 2 x RS-232
• 2 x USB
  e.g. for data exchange or connecting barcode or RFID scanners
• Digital I/O (4 in/4 out) e.g. to control machines and plants
• 1 x additional display
• 1 x WLAN (selected models)

Intuitive use, increases efficiency and saves costs
Easy capture of article data at the PC, call up of items on the balance using the connected barcode or RFID scanner, output of weighing data using the large or second display or control outputs, data transfer to the PC, printer or alibi memory.

Individual user settings can be stored
• User name and number
• Password
• Authorisations
• Menu language (DE, GB, FR, IT, ES, PL)
• User profiles
• Additional guest mode for users without user log-in

High level of process reliability
you can define limit values for selected parameters, such as, for example, temperature, humidity (only models where [d] = 0,01 mg), levelling, minimum load, adjustment etc. When the value falls outside these limits, a warning message will be issued. Limit values and warning messages can be archived with the weighing result

Data exchange via USB
to download software updates, export recipes or weighing results, export/import databases, balance settings, data exchange between individual balances and much more

WE WILL SOLVE YOUR PROBLEMS - SPECIAL BALANCES BY KERN

ATEX scales
Weighing – without it going bang!

In areas where there is a high potential risk of explosion, the user must be able to rely on his apparatus 100 %. We have designed our ATEX IEX and OEX balance ranges for this application.

For all important information on this subject, please see page 174

Axle load scales
Over the legal limit ...?

...not with the mobile axle load scales from the KERN VHP range!
In particular on building sites, at harvest time, when weighing small aircraft or as part of mobile police checks, you can quickly establish whether a vehicle is overloaded or incorrectly loaded, at a reasonable price.

For all important information, please see page 142

Stocktaking scales
Get your inventory levels in an instant

Save valuable time and money when recording your stock levels. Whether as a checkweigher in Goods Inwards, when picking small parts in sales or when recording your entire stock levels within the scope of a regular inventory – with the KERN inventory and Goods Inwards system you are always in safe hands.

For all important information on this subject, please see pages 95 - 97 and page 175

Compact crane scales/force-measuring devices
Harsh environments mean that you need tough tools

These electronic tensile dynamometers are extremely versatile thanks to their stable, compact construction, they can, for example, be fitting into testing machines, used for checking for overload, for bracing and tensile force measurement, etc. This is where the benefit of this construction comes to the fore, as the tensile force can be applied in both directions.

For all important information, please see pages 163/164

Pocket balances

Pocket size precision

Pocket balances are the ideal helpers whenever mobility and high precision are required. Since they have fewer keys, operation is simple and fast. Different weighing units stored in the pocket balance, such as g, oz, ct, gn, etc., make them universally usable. An integrated calculator lets you use the measured weight immediately in calculations, to e.g. determine a a price, quantity, average value and much more. Compact in size and well protected with a flap or protective cover, which can be used as a convenient taring container, the pocket balance is always a useful tool for mobile weighing.

- In production, to control of production weights or during the picking of small parts
- In quality control for the quick testing of small parts like plastic parts from injection moulding machines, milled parts, screws, etc.
- For mobile weighing, on-site sampling, and fast analysis wherever there's no power outlet
- In hobbies and sports, e.g. when filling black powder, weighing parts from modelling kits etc.

- In commerce, for the fast determination of the weights of coins, jewellery, precious stones, etc.
- In veterinary sector for the weighing of small animals, the mixing of feed, etc.
- In the food sector for the preparation of spice or tea mixes, for the weighing of food in line with a diet sheet.

Single-cell cutting edge technology Precision balances

SC TECH

To meet stricter requirements for precision, speed, and
➔ *reproducibility* of weight values, monolithic load cells
are ever more often becoming the standard. These are
measuring sensors for the determination determination
of weight that are made of a compact piece of aluminium.
These systems distinguish themselves from conventional
load cells in terms of both quality and performance:

* Higher measuring speed
* Better measuring precision
* Stable temperature behaviour
* Improved mechanical sturdiness
* Higher corner load reliability

KERN precision and analytical balances equipped with this
measuring system are designated as using "Single Cell
Technology" (➔ *SC TECH*).

School balance KERN EMB-S

The space miracle – stackable school balance for experiment-based teaching

Features

- **Simple and convenient 2-key operation**, making them ideal for use in schools and universities
- **Tare function** facilitates formulation work
- **Particularly flat design**
- **Secure and non-slip positioning** with rubber feet
- **1 Stackable** for space-saving storage
- **2** A practical **transport safety** lock prevents the weighing technology from being overloaded when stored or during transportation
- **Hook for underfloor weighing** standard

Technical data

- Large LCD display, digit height 15 mm
- Dimensions weighing surface Ø 120 mm
- Weighing plate material plastic
- Net weight approx. 0,5 kg/piece
- Optional battery operation, 2 x 1,5 V AA, standard, operating time up to 35 h, AUTO-OFF function to preserve the battery
- Permissible ambient temperature 5 °C / 35 °C
- **Note:** The models are only delivered in a set of 5 units. i.e. the price given in the table refers to a delivery of 5 items. Cannot be delivered individually. The calibration prices given here refer to calibration of a single balance

Accessories

- **External universal mains adapter**, with universal input and optional input socket adapters for EU, GB, USA, not included, can be retrofitted, KERN YKA-03, **€ 40,-**

Compact laboratory balance KERN EMB-V

Compact laboratory balance with integrated density determination function

Features

- **Density determination made easy!** Thanks to the self-explanatory, graphic-assisted control panel, the density of solids and liquids can be determined in seconds, making them ideal for use in schools and universities. For interesting facts about density determination see page 214
- Visualised process avoids operating errors
  - No learning time = reduces costs
  - Ideal for untrained users
- The 4 steps are carried out from left to right:
  1 Tare the balance by pressing the [TARE] key
  2 Select density determination mode (solids/liquids)
  3 Weighing of samples/plummets in air
  4 Weighing of samples/plummets in liquid. The density will be shown on the display right away
- **Particularly flat design**
- **Hook for underfloor weighing** standard

- **Ready for use**: battery 9 V block standard. AUTO-OFF function to preserve the batteries, can be switched off
- **Note:** Balance and appropriate set for density determination should be ordered at the same time, see accessories

Technical data

- Large LCD display, digit height 15 mm
- Weighing plate dimensions, stainless steel, plastic, Ø
  A 82 mm, with conductive lacquer
  B 150 mm, see enlarged picture. The illustration shows the EMB 200-3V model with optional density set YDB-01
- Overall dimensions WxDxH 170x240x54 mm
- Net weight approx. 0,835 kg
- Permissible ambient temperature 5 °C / 35 °C
- **New:** Now also with carat weighing unit:
  EMB 200-3V: 1000 ct / 0,005 ct
  EMB 2000-2V: 10000 ct / 0,05 ct

Accessories

for KERN EMB 200-3V:
- **5** **Set for density determination** of liquids and solids with density ≤/≥ 1. Scope of delivery: Weighing plate, beaker (HxØ 71x51 mm), sample holder, plummet, KERN YDB-01, **€ 215,-**
- **Calibration certificate for the plummet** (20 g), KERN 962-335V, **€ 143,-**

for KERN EMB 2000-2V:
- **6** **Set for density determination** of liquids and solids with density ≤/≥ 1. Scope of delivery: Weighing plate, beaker (HxØ 135x51 mm), sample holder, plummet, KERN YDB-02, **€ 330,-**
- **Calibration certificate for the plummet** (200 g), KERN 962-338V, **€ 141,-**

School balance KERN EMS

Entry level model in the low-cost range with large weighing plate

Features

- Especially suitable for use in schools and universities, for example for biology, chemistry, physics
- **Large**, **shock proof plastic weighing plate**
- **Particularly flat design**
- **Ergonomically optimised key pad** with large keys and a high-contrast LCD display
- **Secure and non-slip positioning** with rubber feet
- **Adjusting program CAL**, external test weights at an additional price, see page 188 ff.
- **1 Draught shield** standard, only for models with weighing plate size **A**, weighing space WxDxH 145x145x65 mm

Technical data

- LCD display, digit height 25 mm
- Weighing plate dimensions, stainless steel, **A** Ø 105 mm, **B** WxD 175x190 mm, see enlarged picture
- Weighing plate material **A** Plastic, with conductive lacquer **B** Plastic
- Dimensions housing WxDxH 200x280x63 mm
- Optional battery operation, battery 9 V block not standard, operating time up to 40 h, AUTO-OFF function to preserve the battery
- Mains adapter external, standard
- Net weight approx. 1,22 kg
- Permissible ambient temperature 5 °C / 35 °C

Accessories

- **2 Stainless steel weighing plate**, only for models with weighing plate size **B**, KERN EMS-A01, **€ 30,-**

Compact laboratory balance KERN PCD

High-resolution precision balance with removable display for maximum flexibility

Features

- **Laboratory balance with separate platform:** Ideal when working in the glove bag or fume cupboard. Particularly practical for weighing toxic, volatile or contaminated substances
- **PRE-TARE function** for manual subtraction of a known container weight, useful for checking fill-levels
- **Freely programmable weighing unit**, e.g. display direct in special units such as length of thread g/m, paper weight g/m², or similar
- **Level indicator and levelling feet** for precise levelling of the scale, fitted as standard, to give the most accurate weighing results

Compact laboratory balance KERN PCB

The standard in the laboratory

GLP/ISO record keeping of weighing data, balance adjustment etc. with date, time and identification no. in combination with an appropriate KERN printer. Ideal for monitoring and documenting your processes in accordance with your quality management system

Plus/minus weighing procedures
For example for checking piece weight, production control, for manufacturing packages of equal weight, etc. The deviation of the test items from a defined target weight will be displayed using the respective "+" and "-" symbols.

With the **recipe function** you can weigh the different ingredients of a mixture. As a check, you can also call up the total weight of all the ingredients

High-resolution precision balance with high resolution and large range of functions

Features

- With its exceptionally large weighing ranges and readouts, this range offers a large pool of products to cover the most varied applications within the laboratory environment. They are therefore particularly suitable for heavy tare containers or large samples
- Stable weighing results thanks to the individual temperature compensation of the strain gauge measuring system which is set at the factory. It is therefore especially suitable for use in areas where there are temperature fluctuations
- The measuring system's exceptionally high resolution of 420,000 points ensures the highest level of accuracy with large weighing ranges. Almost unbeatable in this price category
- **Compact size**, practical for small spaces
- **Weighing sum memory** sums up individual weighing results

- **Glass draught shield**, standard for models with weighing plate size A. Removable metal cover with pipette opening. Weighing space ØxH 125x70 mm

Technical data

- Backlit LCD display, digit height 15 mm
- Weighing plate dimensions, stainless steel, A Ø 80 mm, B Ø 135 mm, see enlarged picture

Compact laboratory balance KERN PKS

Laboratory specialist with clear graphics display for the most simple user guidance
Large backlit graphic display
All relevant information for the mode you are using is displayed clearly, at a glance and assigned to the keys are assigned on the keyboard overlay

Weighing with tolerance range (checkweighing): Input of an upper/lower limit value. A visual signal assists with portioning, dispensing or grading

Convenient recipe weighing
you can save up to 5 complete recipes in the memory with up to 7 components of each. The individual components of a mixture can be printed out clearly with their name, weight and grand total

GLP/ISO record keeping of weighing data, balance adjustment, etc. with date, time and identification no. etc. Ideal for monitoring and documenting your processes in accordance with your quality management system

Compact laboratory balance KERN PKS

Features

- Based on the KERN bestseller KB, many typical laboratory functions have been expanded to include a clear graphic screen, which shows the relevant information and makes it significantly easier to operate and read the weights off the display
- **1 Navigation pad** for super quick navigating through the menus
- **40 memories for each operation mode**
- Extensive print formatting – up to 20 lines with fixed and variable texts
- **Freely programmable weighing unit**, e.g. display direct in special units such as length of thread g/m, paper weight g/m^2, or similar
- **High mobility**: thanks to rechargeable battery operation (optional), compact, lightweight construction, it is suitable for the use in several locations (laboratory, production, quality control, commissioning etc.)
- **Ring-shaped draught shield** standard for models with weighing plate size A, weighing space ØxH 90x53 mm
- **Hook for underfloor weighing** of hanging loads standard

Precision balances KERN 572 · 573

All-rounder e.g. as precision balance in the laboratory or in harsh industrial applications, also with EC type approval [M]

Features

- Thanks to the **many typical laboratory functions**, such as, for example, recipe function, percentage determination, GLP record keeping, combined with the high level of precision, the KERN 572 is a reliable partner for day-to-day work in the laboratory.
- The **robust version**, typical industrial functions, such as piece-counting, vibration-free weighing and the large weighing ranges also make these balances ideal for all industrial applications, where a high level of precision is required

- **Freely programmable weighing unit**, e.g. display direct in special units such as length of thread g/m, paper weight g/m², or similar
- **The robust aluminium diecast housing** maintains the stability, protects the weighing technology elements and is robust enough to cope with everyday use
- only 572: **Ring-shaped draught shield** standard (Weighing plate A), weighing space ØxH 157x43 mm
- Hook for underfloor weighing, for models with [d] ≥ 0,01 g, can be retrofitted, KERN 572-A03, **€ 25,-**
- **1 UNITS:** Further weighing units see the internet (only 572)

Technical data

- Large backlit LCD display, digit height 18 mm

3

The new standard in the laboratory with robust tuning fork weighing system

Features

- 1 only PNJ: **Automatic internal adjustment**, guarantees high degree of accuracy and makes the balance independent of its location of use. Ideal for mobile applications which require verification, such as ambulatory gold and jewellery purchasing
- 2 only PNS: **Adjusting program CAL** for quick setting of the balance accuracy using an external test weight
- **High-quality tuning fork measuring system** for steady weight values and continuous weighing
- **Capacity display:** A bar lights up to show how much of the weighing range is still available
- **Precise counting:** The automatic reference weight optimisation of reference weight gradually improves the average piece weight value
- **Totalising** of pieces when counting

- **Compact size**, practical for small spaces
- Large stainless steel-weighing plate, removable
- **Large glass draught shield** with 3 sliding doors for easy access to the items being weighed, for models with weighing plate size A, weighing space WxDxH 172x171x160 mm
Technical data

- Large LCD display, digit height 16,5 mm
- Weighing plate dimensions, stainless steel,
  A Ø 140 mm
  B WxD 190x190 mm, see enlarged picture
- Overall dimensions WxDxH for models with weighing plate size
  A 202x293x266 mm
  B 196x293x89 mm
- Net weight for models with weighing plate size
  A Net weight approx. 4,2 kg
  B Net weight approx. 3,5 kg
- Permissible ambient temperature 5 °C / 35 °C

Accessories

- **Protective working cover** over keyboard and housing, standard. Can be re-ordered, scope of delivery: 5 items, KERN PNJ-A01S05, **€ 50,-**
- 3 **Precious stones plate**, aluminium with practical spout, WxDxH 83x66x23 mm, KERN AEJ-A05, **€ 40,-**
- **RS-232/Ethernet adapter** for connection to an IP-based Ethernet network, for details see page 180, KERN YKI-01, **€ 390,-**

Precision balances KERN PLJ-C · PLJ-G

Process reliability thanks to automatic internal adjustment and EC type approval [M]

Features

- **Automatic internal adjustment** in the case of temperature change ≥ 3 °C and time-controlled every 3 hours
- 1 **Draught shield** standard (on all models with readout [d] = 0,001 g). Weighing space WxDxH 140x140x65 mm

PLJ -C:

- 2 Weighing principle: Force compensation
- **Alibi memory:** paperless archive of weighing results, see page 214
- **Internal memory** for up to 999 weighing results, 1000 items, 100 container weights, 100 users
- **USB interface** for transferring weighing data to the PC, printer, USB sticks etc.

PLJ -GM:

- 3 Weighing principle: Strain gauge
- Rechargeable battery pack internal, standard, operating time up to 35 h, charging time approx. 12 h

Technical data

- Backlit LCD display
  PLJ-C: digit height 17 mm
  PLJ-G: digit height 19 mm
- Weighing plate dimensions, stainless steel, WxD

Precision balance KERN PKT

Internal memory

- Ring memory for up to 49,152 measuring results (744 measuring results per day!)

- Saved measuring results cannot be changed or cleared. If the maximum memory capacity is reached, then the oldest value will be overwritten

- In addition to the measuring result, the date, time, tare value, a sequential number and the serial number of the balance are also saved.

- Saved measuring results can be searched and recalled easily

Touchscreen laboratory and industrial scale with enormous range of functions
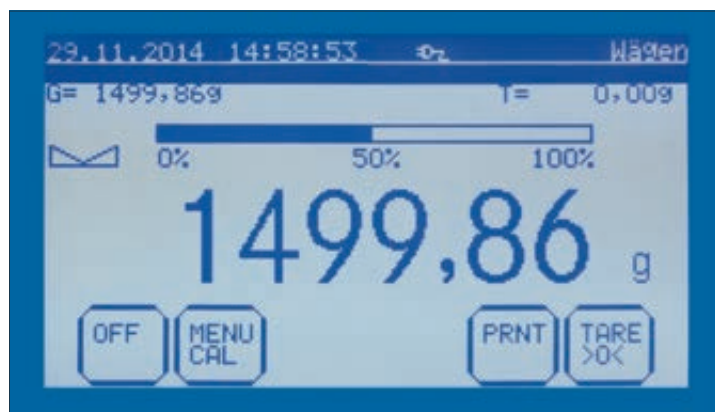

Display at full size, **operating mode weighing**

Innovative touchscreen: touch-sensitive, backlit screen with very good contrast for easy operation and convenient reading

Advantages:
- The menu and processes are self-explanatory
- No more errors or lost time through keys wich have several functions assigned to them or unclear markings
- Large keys, which can also be operated when wearing gloves
- More efficient, faster and safer working
80 memories for each mode
e.g. for Checkweighing, PRE-TARE, reference weight, target value when dispensing, item descriptions, user name, weights for tare containers, etc. Easy to enter using the large-scale keypad
Weighing with tolerance range (checkweighing): Input of an upper/lower limit value. A visual signal assists with portioning, dispensing or grading

Convenient recipe weighing
you can save up to 99 complete recipes in the memory with up to 10 components each. The individual components of a mixture can be printed out clearly with their name, weight and grand total

Features

- **Convenient recipe-weighing:** the recipes can be generated easily in an Excel list in the PC and transferred to the balance using the RS-232 interface. Alternatively, the recipes can also be entered directly using the keypad. If one recipe ingredient is overweight, then the practical recipe adjustment function for when dosages are exceeded automatically calculates the new target weights of the other ingredients. The actual and target values and the proportionate percentage can then be printed
- **Multiplier function:** recipes with the ingredient weights recorded as percentage values can easily be replicated by entering a new target weight. The ideal solution for the preparation of larger containers, bulk packs etc.
- **16 print forms** which can store up to 20 different information, such as, e.g., date, time, operator, item, net, tare, gross, PCS, target weight, PRE-TARE etc. The print forms can be generated easily in an Excel list in the PC and transferred to the balance using the RS-232 interface
- **Rapid function** for shortened stabilisation time with reduced readout
- **Ring-shaped draught shield** standard for models with weighing plate size A, weighing space ØxH 157x57 mm
- **Hook for underfloor weighing**, standard on all models with readout [d] = 0,001 g

Technical data

- Large backlit LCD touch display, digit height 15 mm, screen diagonal 4,3" (approx. 109 mm), WxH 91x54 mm
- Weighing plate dimensions, stainless steel, A Ø 106 mm, B Ø 150 mm C WxD 160x200 mm, see enlarged picture
- Overall dimensions WxDxH 180x310x90 mm
- Permissible ambient temperature 10 °C / 40 °C

Accessories

- **Protective working cover** standard. Can be re-ordered, scope of delivery: 5 items, KERN 572-A02S05, **€ 35,-**
- **Rechargeable battery pack external**, operating time up to 15 hours with backlight, charging time approx. 10 h, KERN KS-A01, **€ 180,-**
- 1 **Large glass draught shield** with 3 sliding doors. Weighing space WxDxH 150x140x130 mm (only for models with weighing plate size A), KERN 572-A05, **€ 220,-**
- **Set for density determination** of liquids and solids with density ≤/≥ 1, 2 for models with weighing plate size A, KERN YDK-01, **€ 205,-** 3 for models with weighing plate size B, KERN YDK-02, **€ 310,-**

Precision balances KERN EW-N · EG-N

The classic balance with robust tuning fork measuring system

GLP/ISO record keeping of weighing data, balance adjustment, etc. with date, time and identification no. etc. Ideal for monitoring and documenting your processes in accordance with your quality management system

Percentage determination: makes it possible to store a given weight value (100 %) and to determine deviations from this target value

Weighing with tolerance range (checkweighing): a visual signal helps with portioning, dispensing or grading

Precision balances KERN PBS · PBJ

Multifunctional laboratory balance with single-cell weighing system and EC type approval [M]

[2] only PBS: **Adjusting program CAL** for quick setting of the balance accuracy, external test weights at an additional price

Simple recipe weighing and documenting with a combined tare/print function. In addition, the ingredients for the recipe are numbered automatically and printed out with their corresponding number and nominal weight

Percentage determination: makes it possible to store a given weight value (100 %) and to determine deviations from this target value

Precision balances KERN PBS · PBJ

Features

- **1** only PBJ: **Automatic internal adjustment** in the case of a change in temperature and time-controlled at defined intervals, guarantees high degree of accuracy and makes the balance independent of its location of use. Ideal for mobile applications which require verification, such as ambulatory gold and jewellery purchasing
- **Metal housing:** robust and sturdy
- **Dosage aid:** High-stability mode and other filter settings can be selected
- **Weighing with tolerance range (checkweighing):** Input of an upper/lower limit value. A visual signal assists with portioning, dispensing or grading
- **Totalising** of individual weighing results
- **Identification number:** 4 digits, printed on calibration protocol freely programmable
- **Automatic data output to the PC/printer** each time the balance is steady

Premium precision balance KERN PET

PREMIUM
★★★

KERN PET [d] = 0,01 g

KERN PET [d] = 0,001 g

Premium touchscreen precision balance with the complete range of functions for demanding processes

Individual print formats: Printouts can be individually adjusted depending on operating mode, application or your own requirements, directly at the balance or the PC. In this way the data related to these processes is documented accurately, efficiently and clearly

Convenient recipe-weighing: complete recipes with all recipe ingredients and associated target values, names, tolerances, tare weights etc. can be stored. If one recipe ingredient is overweight, then the practical recipe adjustment function for when dosages are exceeded automatically calculates the new target weights of the other ingredients

Modes
① Weighing
② Piece counting
③ Checkweighing
④ Dispensing
⑤ Percentage determination
⑥ Density
⑦ Animal weighing
⑧ Recipe weighing
⑨ Statistics
⑩ Pipette calibration
⑪ Differential weighing
⑫ Statistical Quality Control (SQC)

Funcitons
• Capacity display, with ① - ⑫
• Dispensing assistance, with ④, ⑤
• Net/Gross display, with ① - ⑫
• Variable reference quantity, with ②
• Automatic reference optimization, with ②
• Tare deduction automatic, with ① - ⑫
• Entering of item or batch description, operator etc., with ① - ⑫
• Freely programmable weighing unit, with ① - ⑫
• Date/time, with ① - ⑫
• Statistical function, as stand-alone application
• GLP printout, with ① - ⑫
• Individual formatting of print-outs, with ① - ⑫

Premium precision balance KERN PET

3 rapid assignment keys
for frequently recurring applications, functions, settings or memory contents

2 infrared sensors
to initiate functions such as TARE, zeroing, for carrying out, starting or aborting adjustment, calling up database or menu and much more, without having to touch the balance – just give it a wave!

Customised formatting of printout
a range of printouts which can be edited easily at the PC

High level of connectivity
- 1 x Ethernet
- 2 x RS-232
- 2 x USB
  e.g. for data exchange or connecting barcode or RFID scanners
- Digital I/O (4 in/4 out) e.g. to control machines and plants
- 1 x additional display
- 1 x WLAN (selected models)

Individual user settings can be stored
- User name and number
- Password
- Authorisations
- Menu language (DE, GB, FR, IT, ES, PL)
- User profiles
- Additional guest mode for users without user log-in

Alibi memory
Electronic archiving of weighing results, see also page 214
Statistical function
for statistical analysis of series of measurements. The graphic display of measurements can be used by the operator to check and evaluate their results

Intuitive use, increases efficiency and saves costs
Easy capture of article data at the PC, call up of items on the balance using the connected barcode or RFID scanner, output of weighing data using the large or second display or control outputs, data transfer to the PC, printer or alibi memory.

Innovative touchscreen
Large backlit and touch-sensitive LCD screen with digit height 17 mm, screen size 5.7" (approx. 145 mm), WxH 115x86 mm. Dimensions of display device WxDxH 208x71x150 mm.

Convenient recipe-weighing
complete recipes with all recipe ingredients and associated nominal values, names, tolerances, tare weights etc. can be stored. If one recipe ingredient is overweight, then the practical recipe adjustment function for when dosages are exceeded automatically calculates the new target weights of the other ingredients. Recipes and their ingredients can be multiplied at will at the press of a button, which is ideal for the production of larger containers, bulk packs etc. (Multiplier function)

Enormous database
with optional software KERN PET-A01, this can be filled in easily at the PC. Particularly beneficial when counting a large number of individual items, as part of a stocktacking, for checkweighing, recording recipes etc.

Data exchange via USB
to download software updates, export recipes or weighing results, export/import databases, balance settings, data exchange between individual balances and much more

Premium precision balance KERN PET
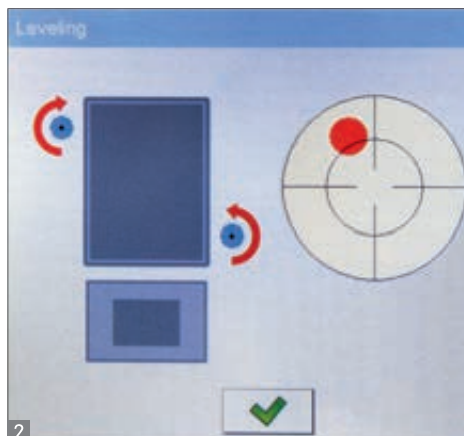

Features

- **Intuitive operation, increases efficiency and saves costs:** Easy entering of item data at the PC, call up of items on the balance using the connected 1 barcode or RFID scanner, output of weighing data using the large or second display or control outputs, data transfer to the PC, printer or alibi memory
- **Individual user settings can be stored** User name and number
  - Password
  - Menu language
  - User profile
  - Additional guest mode for users without log-in
  - Authorisations, e.g. capture or modification of a recipe only with authorisation, recipe weighing can be carried out by the user
- **Best-before dates** can be stored and printed for each item
- **Difference determination:** Weighing a sample before and after a machining process and automatic output of the difference value
- **Multiplier function:** recipes and their ingredients can be multiplied at will at the press of a button, which is ideal for the production of larger containers, bulk packs etc.
- **Enormous database (1 GB)** for thousands of weighing results, items, recipes, recipe ingredients, container weights, user data etc.
- **Alibi memory:** electronic archiving of weighing results, see also page S. 214

- 2 **Electronic level indicator** continuously checks the position of the balance, sounds an alarm when the device is out of balance and gives visual instructions on how to correct the situation
- 3 **High level of process reliability:** you can define limit values for selected parameters, such as, for example, temperature, levelling, minimum load, adjustment, etc. When the value falls outside these limits, a warning message will be issued and this can be stored with the measuring result
- **Draught shield** standard for models with weighing plate size A, weighing space WxDxH 140x140x65 mm

Technical data

- Backlit and touch-sensitive LCD display with digit height 21 mm, screen diagonal 5,7" (approx. 145 mm), WxH 115x86 mm. Dimensions of display device WxDxH 215x156x71 mm
- Hook for underfloor weighing standard

Analytical balances KERN ADB

NEW

The price leader in analytical balances

Features

- Optimised price performance ratio, ideal for laboratories, universities, schools
- **Large glass draught shield** with 3 sliding doors for easy access to the items being weighed. Also ideal for large, light samples such as polystyrene, tissue, plastic parts, etc.
- The **wired display device** can be adjusted differently to suit the ergonomic requirements of the user or the workplace. In addition, it eliminates any heat effect on the weighing system from the display device
- **Ergonomically optimised keypad** for left and righthanded users
- **Percentage determination:** makes it possible to store a given weight value (100 %) and to determine deviations from this target value
- **Adjusting program CAL**, external test weights at an additional price, see page 188 ff.

Technical data

- Large backlit LCD display with digit height 19,6 mm
- Dimensions of weighing plate, stainless steel, Ø 90 mm
- Overall dimensions WxDxH 190x475x295 mm
- Weighing space WxDxH 215x205x295 mm
- External mains adapter standard, EU, GB, AUS
- Cable length of display device approx. 0,5 m
- Permissible ambient temperature 10 °C / 30 °C
- Net weight approx. 6 kg

Accessories

- **Protective working cover**, standard. Can be re-ordered, scope of delivery 5 pieces, KERN ADB-A01S05, **€ 30,-**
- **1 Ioniser** to neutralise electrostatic charge, see page 183, KERN YBI-01, **€ 1350,-**
- **2 Weighing table** to absorb vibrations and oscillations, which would otherwise distort the weighing result, see page 183, KERN YPS-03, **€ 900,-**
- **3 Precious stones plate**, aluminium with practical spout, WxDxH 83x66x23 mm, weighing space, KERN AEJ-A05, **€ 40,-**

Analytical balance KERN ALS-A · ALJ-A

Range of analytical balances, with large weighing ranges, also with EC type approval [M]

Features

- ☐1 only ALJ-A: **Automatic internal adjustment** in the case of a change in temperature > 1,5 °C
- ☐2 only ALS-A: **Adjusting program CAL** for quick setting of the balance accuracy, external test weights at an additional price, see page 188 ff.
- **Ergonomically optimised keypad** for left and righthanded users
- **Large glass draught shield** with 3 sliding doors for easy access to the items being weighed
- **Compact size**, practical for small spaces
- **Percentage determination:** makes it possible to store a given weight value (100 %) and to determine deviations from this target value

Technical data

- Backlit LCD display, digit height 17 mm
- Weighing plate dimensions, stainless steel, Ø 80 mm
- Overall dimensions (incl. draught shield) WxDxH 210x340x330 mm

6 Single-cell advanced technology:
- **Fully automatic manufactured weighing cell from one piece of material**
- **Stable temperature behaviour**
- **Short stabilisation time:**
  Steady weight values within approx. 3 sec under laboratory conditions
- **Shock proof construction**
- **High corner load performance**

The bestseller in analytical balances, with high-quality single-cell weighing system, also with EC type approval [M]

Features

- 1 only ABJ-NM: **Automatic internal adjustment** in the case of a temperature change > 2 °C and time-controlled every 4 hours
- 2 only ABS-N: **Adjusting program CAL**, external test weights at an additional price, see page 188 ff.
- **Dosage aid:** High-stability mode and other filter settings can be selected
- **Simple recipe weighing and documenting** with a combined tare/print function. In addition, the ingredients for the recipe are numbered automatically and printed out with their corresponding number and nominal weight

- **Automatic data output** to the PC/printer each time the balance has obtained a stable weighing result
- **Identification number:** 4 digits, printed on calibration protocol freely programmable
- ABJ-NM has OIML certification

Technical data

- Large LCD display, digit height 14 mm
- Weighing plate dimensions, stainless steel, Ø 91 mm

Analytical balance KERN AES-C · AEJ-CM
Compact high-end analytical balance with useful pipette calibration program and alibi memory

Features

- 1️⃣ only AEJ-CM: **Automatic internal adjustment** in the case of a change in temperature > 0,8 °C and time-controlled every 3 hours
- 2️⃣ **Intuitive pipette calibration function** to ensure data integrity and to minimise the risks in the daily work with your pipettes
- Higher weighing speed by switching off the last digit
- **Modern all glass draught wind shield** for ideal visibility of the weighing object
- **Dispensing mode:** By pressing one key you can set all relevant parameters for dispensing
- **Alibi memory:** Paperless archiving of up to 100,000 weighing results. Additional information on page 11.

- **Note:** For weighings where verification is mandatory, and which are to be analysed and processed by a PC, the legislative body requires electronic archiving using a verifiable, non-manipulatable data memory
- **Internal memory** for up to 999 weighing results, 1000 items or recipe ingredients, 100 container weights, 100 users

Technical data

- Large backlit LCD display, digit height 17 mm
- Weighing plate dimensions, stainless steel, Ø 85 mm
- Overall dimensions WxDxH 206x335x335 mm
- Weighing space WxDxH 168x160x225 mm

Analytical balance KERN AET

KERN AET [d] = 0,1 mg

KERN AET [d] = 0,01 mg

Note for information on further useful functions for this range, please see pages 6 and 7

Premium touchscreen analytical balance with the complete range of functions for demanding processes

Software supported pipette calibration in accordance with ISO 8655: The user is guided through the pipette calibration procedure step by step, in accordance with the requirements of the norm. This helps to ensure that the pipetting volumes are correct and minimises the risks in daily pipetting work

Convenient recipe-weighing: complete recipes with all recipe ingredients and associated target values, names, tolerances, tare weights etc. can be stored. If there is an excess amount of one recipe ingredient the practical back calculation function automatically calculates the new target weights of the other ingredients

Analytical balance KERN AET
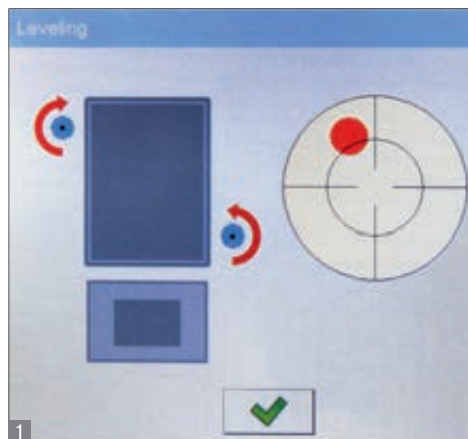

Features

- **Intuitive operation**, **increases efficiency and saves costs:** Easy entering of item data at the PC, call up of items on the balance using the connected barcode or RFID scanner, output of weighing data using the large or second display or control outputs, data transfer to the PC, printer or alibi memory.
- **Individual user settings can be stored**
  - User name and number
  - Password
  - Menu language
  - User profile
  - Additional guest mode for users without log-in
  - Authorisations, e.g. capture or modification of a recipe only by those with authorisation, recipe weighing can be carried out by the user
- **Best-before dates** can be stored and printed for each item
- **Difference determination:** Weighing a sample before and after a machining process and automatic output of the difference value
- **Multiplier function:** recipes and their ingredients can be multiplied at will at the press of a button, which is ideal for the production of larger containers, bulk packs etc.
- **Enormous database (1 GB)** for thousands of weighing results, items, recipes, recipe ingredients, container weights, user data etc.
- **Alibi memory:** paperless archive of weighing results, see page 214
- ▮1 **Electronic level indicator** continuously checks the position of the balance, sounds an alarm when the device is out of balance and gives visual instructions on how to correct the situation

- ▮2 **High level of process reliability:** you can define limit values for selected parameters, such as, for example, temperature, levelling, minimum load, adjustment, etc. When the value falls outside these limits, a warning message will be issued and this can be stored with the measuring result
- ▮3 only AET 200-5DM: **Grid weighing pan**, **metal draught shield and hook for suspended weighing** as standard
- ▮4 only AET-NM/DAM:
  - WLAN data interface to transfer data from the balance to a printer, PC or other peripheral devices
  - Enormous database (8 GB)
  - Faster Dual-Core Processor (2 x 1 GB)

Technical data

- Backlit and touch-sensitive LCD display with digit height 21mm, screen diagonal 5,7" (approx. 145 mm), WxH 115x86 mm. Dimensions of display device WxDxH 215x156x71 mm
- Weighing plate dimensions, stainless steel, Ø 85 mm
- Dimensions housing WxDxH on all models with [d] = 0,01 mg: 348x540x217 mm [d] = 0,1 mg: 160x168x225 mm
- Weighing space WxDxH 168x160x225 mm
- Permissible ambient temperature 18 °C / 30 °C

Accessories

- **Protective working cover** over the display device, standard. Can be re-ordered, suitable for the series AET, PET, ILT, scope of delivery: 5 items, KERN ILT-A02S05, **€ 19,-**
- **Protective dust cover**, for models AET 500-4 and AET 200-4NM, KERN ABS-A08, **€ 30,-**
- **RS-232 barcode scanner**, hand-held version, dimensions WxDxH 152x84x63 mm, for details see page 184, KERN PET-A05, **€ 350,-**
- **USB barcode scanner**, hand-held version, dimensions WxDxH 152x84x63 mm, for details see page 184, KERN PET-A09, **€ 350,-**
- **USB keyboard** for easy capture of items, descriptions etc., dimensions WxDxH 440x128x24 mm, for details see page 187, KERN PET-A06, **€ 45,-**
- **Second display**, dimensions WxDxH 150x33x80 mm, for details see page 184, KERN PET-A03, **€ 210,-**
- **Direct thermal label printer**, software for easy editing of (adhesive) labels included, for details see page 184, KERN PET-A13, **€ 980,-**
- **Thermal transfer and direct thermal label printer**, software for easy editing of (adhesive) labels included, for details see page 184, KERN PET-A14, **€ 1000,-**
- **Software for database management**, for convenient maintenance of item data at the PC. Data transfer to the balance using the interface cable (see page 180), for details see page 184, KERN PET-A01, **€ 300,-**
- **Set for density determination** of liquids and solids ≤/≥ 1. The internal density determination software in the balance takes you through the process, step by step, and shows the density on the display. For details see page 183, KERN YDB-03, **€ 520,-**

Often it is the small things which make daily laboratory life easier.

On this page we have put together a small selection of practical accessories for your demanding weighing processes.

Weighing table

Accurate measuring results require stable working conditions! The KERN YPS-03 weighing table has been constructed to absorb vibrations and oscillations, which would otherwise distort the weighing result. Suitable for all KERN analytical balances with total dimensions ≤ WxD 270x410 mm.

KERN YPS-03, **€ 900,-**

Ioniser to neutralise electrostatic charge

Goods to be weighed which are non-conductive, such as plastic, china, glass, etc often carry electrostatic charge. The electromagnetic field which then occurs between the goods to be weighed and the balance can cause the weighing result to be distorted by up to a gramme. Suitable for all KERN analytical balances.

KERN YBI-01, **€ 1350,-**

Protective dust cover

For protection from dust and light.
Suitable for all KERN analytical balances, except KERN ADB, AET 100-5AM, AET 200-5DAM.

KERN ABS-A08, **€ 30,-**

Universal density set

Universal density set for precise and convenient density determination of liquids and solids ≤/≥ 1. Suitable for all KERN analytical balances.

KERN YDB-03, **€ 520,-**

Thermal statistics printer

For printing weights, recipes etc. or for GLP record keeping of weighing data with date and time print. With extensive statistical functions for the analysis of measurements series. Suitable for all KERN analytical balances (except AET).

KERN YKS-01, **€ 390,-**

Moisture analysing is an integral part of production and processing of many raw and finished products and has a crucial impact on the quality of the product.

Moisture analysers are used particularly in the food industry, water resource management (sewage plants, etc.), plastics industry, agriculture and the energy industry (bio-energy plants, etc.).

Determining moisture requires a great deal of experience. Depending on the type of sample and the task involved, various drying processes are used.

KERN has concentrated on the most widely-used drying method: halogen drying, which brings many advantages:

- Sample is evenly warmed from above, without risk of burning the sample surface
- Affordable purchase costs ensure rapid amortisation of the device
- Most common temperature ranges from 35 – 200 °C

- High measuring precision, up to 0.01 %
- Sufficient buffer capacity, weighing range up to 160 g
- Various drying programs (soft drying, standard drying, drying in levels, rapid drying (Boost))

The numerous memories of the KERN moisture analyser are particularly useful, as they hold information on the complete drying processes with drying parameters such as drying time, drying period, drying temperature, display settings, switch off criteria, etc. This saves an enormous amount of time and helps to achieve repeatable results.

On the internet, you will find a practical application hand-book containing many examples, field reports, settings and tips for each KERN moisture analyser.

Note: We would be pleased to carry out individual analyses on the sample you submit, which will help you when setting the parameters of your moisture analyser and will lead to results which can be reproduced.

Moisture analyser KERN DLT-N

PREMIUM ★★★

High-end moisture analyser with touch-sensitive tablet and innovative Android® operating system

Particularly in the pharmaceutical, food, chemical and construction industries, being able to analyse the moisture content of materials at Goods Inwards and production is an important tool to ensure product quality and robust production processes.

In biogas plants, sewage treatment plants or landfill sites, the drying of biomass has always been extremely important. Controlling the moisture content precisely helps, for example, to reduce transport weights or increase heating values

In the timber industry, statements which can be validated relating to the moisture content and the resulting mechanical and technological characteristics of the wood or the fuel and heating values of wood chips, pellets, etc. are of economic importance

12 Practical net weighing assistance to a defined target value [g] with adjustable tolerance range 1–25 % of the target value

11 Graphic display of the drying curve shows the progress of the drying process in real time and can be used by the operator to check and evaluate the result
- **High mobility thanks to tablet operation**, data is available any time, anywhere
- **High-performance Android® operating system**
- **Lots of memory** for your applications
- **Halogen quartz glass heater** 400 W
- **10 sample plates included**
- **WLAN and Bluetooth interfaces as standard** to transfer data to a PC (e.g. to KERN Balance-Connection 4.0 software, see page 179) or to print out the weighing data, drying curves etc. for archiving purposes using a Bluetooth thermal printer KERN YKC-01, see page 178

13 Balance contains memories for 100 memories for drying processes (drying protocols) which have been carried out and which can be recalled individually
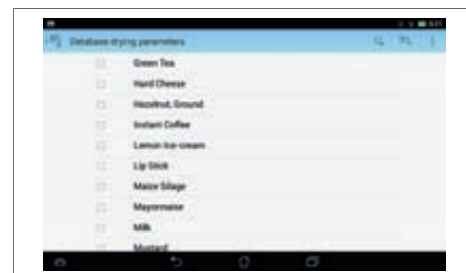

Balance contains memories for automatic sequence of 300 drying programs (12 free characters for each memory). Many useful programs are already preinstalled

Accessories

Compact industrial weighing technology

Thanks to their compact dimensions, low weight, robust internal mechanism and the fact that they can be operated independent of mains power, bench scales can be used not only in a stationary situation, but also as mobile scales.

With weighing ranges between 3 kg and 65 kg, bench scales can cover a wide range of applications. Whether as a commissioning scale in the warehouse, for inventory purposes, on a production work station, in quality control, in small workshops, in service cars or in sales offices, bench scales are the first choice.

Durable stainless steel weighing plates, easy to read backlit displays, useful functions such as piece counting, PRE-TARE – subtraction of a known container weight, or ➔ *interfaces* to PC and printer, all these support the user in their daily work

➔ *Dual range* scales cover a particularly wide range of applications. With these scales, the total weighing range is divided into 2 subranges and begins with a high resolution read-out in the fine weighing range. If this range is exceeded the balance automatically switches to the higher weighing range with the lower resolution read-out.

All KERN bench scales have an adjustment program (CAL) to adjust the accuracy. In this way, the high level of accuracy is guaranteed at all times, even during harsh everyday use. Find the right test weights for you, see page 188.

Touchscreen balances
The newest development for an even greater level of user-friendliness is the intuitive touchscreen operation, which is being integrated into new KERN models, see page 34/35 (PKT), 41–43 (PET), 50/51 (AET), 70/71 (FKT), 170/171 (FKTF), 96 (FKA), 97 (FKC), 118/119 (IKT), 120/121 (ILT)

Your product specialist's recommendation:

👍 **With type approval – which makes it suitable for a wide variety of uses, e.g. retail, catering trade, supermarkets, cafeterias, etc.**

👍 **Designed for mobile use**

👍 **Rapid and steady weighing results**

Plain, mobile, uncomplicated

Features

- 2 **High mobility:** Battery operation, compact, flat construction, recessed grips on the underside and low weight make this balance ideal for use in several locations
- **Particularly large weighing plate**
- **Very fast display:** steady weight values within 2 sec
- **Simple and convenient 2-key operation**

Technical data

- Large backlit LCD display, digit height 21 mm
- Weighing plate dimensions (1 ECE: plastic, ECB: stainless steel) WxD 318x258 mm
- Overall dimensions WxDxH 320x300x60 mm
- Optional battery operation, 6 x 1.5 V AA not included, operating time up to 100 h. AUTO-OFF function to preserve the batteries
- Permissible ambient temperature 5 °C / 35 °C

Accessories

- **External universal mains adapter**, with universal input and optional input socket adapters for CH, EU, GB, USA, not included, can be retrofitted, KERN YKA-03, **€ 40,-**

Bench scale KERN FCE-N

Entry-level bench scale – mobile, practical, lightweight

Features

- **Simple and convenient 2-key operation**
- **Very fast display:** steady weight values within 2 sec
- **1** Ideal as a compact letter and parcel scale, especially where space is limited
- **2** Ideal as a grading, comissioning or simple checkweighing scale in production or dispatch

Technical data

- Large LCD display, digit height 25 mm
- Weighing plate dimensions, plastic, WxD 252x228 mm
- Overall dimensions WxDxH 270x345x106 mm
- Optional battery operation, 9 V block not included, operating time up to 12 h. AUTO-OFF function to preserve the battery.
- Net weight approx. 2,5 kg
- Permissible ambient temperature 5 °C / 35 °C

Bench scale KERN FKB-A

Bench scale up to 65 kg with large weighing plate

Features

- **PRE-TARE function** for manual subtraction of a known container weight, useful for checking fill-levels
- 1 **Particularly practical:** thanks to the large weighing ranges and compact dimensions, you can accurately weigh heavy loads in the most restricted of spaces. Useful for determining very small weight differences, such as, for example, gas wastage, abrasion of mechanical parts etc.
- **Freely programmable weighing unit**, e.g. display direct in special units such as length of wire g/m, surface weight g/m², or else

Technical data

- Large backlit LCD display, digit height 25 mm
- Weighing plate dimensions, stainless steel, WxD 340x240 mm
- Overall dimensions WxDxH 350x390x120 mm
- Optional battery operation, 9 V block not included, operating time up to 12 h

Application examples:
- Small industrial scale for pharmacies
- Hand mixtures of tea, coffee, chocolates
- Portioning of dough, meat, fish, poultry, mixed salads in cafeterias etc.
- Mobile weighing of freshly picked fruit on site
- High-precision industrial applications

Note: Official verification duty for commercial trade

Checkweighing and portioning scale, also with EC type approval [M]

Features

- **Compact size**, practical for small spaces
- **High mobility:** thanks to battery operation (optional)
- **Weighing with tolerance range (checkweighing):** Input of an upper/lower limit value. A visual and audible signal assists with portioning, dispensing or grading
- **Totalising** of weights

Technical data

Bench scale KERN GAB-P

Application examples:
- Small industrial scale for pharmacies
- Hand mixtures of tea, coffee, chocolates
- Portioning of dough, meat, fish, poultry, mixed salads in cafeterias etc.
- pick your own fruit and vegetable sales
- High-precision industrial applications, piece counting or stock-taking

Note: Official verification duty for commercial trade

Checkweighing and portioning scale with integrated printer and EC type approval [M]

Features

- Precise bench scale for applications (which require verification), where the weight values must be documented and archived through print outs or data transfer, such as, e.g. quantities obtained in stocktaking
- The determined weight, quantity, totals, percentage etc. can be printed out with clearly date and time
- **Internal printer:** Robust high-speed thermal printer. Fast and easy change of paper rolls thanks to innovative paper compartment construction
- **High mobility:** thanks to battery operation, compact construction and low weight,

it is suitable for use in several locations (production, warehouse, dispatch department etc.)
- **Compact size**, practical for small spaces
- **Weighing with tolerance range (checkweighing):** Input of an upper/lower limit value. A visual and audible signal assists with portioning, dispensing or grading

Technical data

- Large backlit LCD display, digit height 20 mm
- Weighing plate dimensions, stainless steel, WxD 365x235 mm
- Overall dimensions WxDxH 371x366x131 mm
- Net weight approx. 4,4 kg
- Permissible ambient temperature -10 °C / 40 °C

Accessories

- **Thermal receipt rolls** (10 pieces), width 56 mm, Ø 51 mm, KERN RFS-A10, **€ 40,-**
- **Signal lamp**, for details see page 181, KERN CFS-A03, **€ 250,-**
- **Rechargeable battery pack internal**, standard, operating time up to 150 hours without backlight and use of printer, charging time approx. 12 h, can be retrofitted, KERN HFM-A01, **€ 50,-**
- **Suitable printers** and further, extensive accessories from page 177 ff.

Bench scales KERN FKB · FKB-M

Large, high resolution bench scale, also with EC type approval [M]

Features

- Thanks to the high resolution of up to 360,000 points it is ideal for high-precision weighing in the industrial field. It is also available in a version with EC type approval class II for applications which require verification (FKB-M)
- **PRE-TARE function** for manual subtraction of a known container weight, useful for checking fill-levels
- only FKB: **Freely programmable weighing unit**, e.g. display direct in special units such as length of wire g/m, surface weight g/m^2, or else
- 1 **Particularly practical:** thanks to the large weighing ranges and compact dimensions, you can accurately weigh heavy loads in the most restricted of spaces. Useful for determining very small weight differences, such as, e.g. gas wastage, abrasion of mechanical parts, rock samples, minerals, druses, silver etc.

Technical data

- Backlit LCD display, digit height 18 mm
- Weighing plate dimensions, stainless steel, WxD 340x240 mm
- Dimensions housing WxDxH 350x390x120 mm
- Optional battery operation, batteries 6 x 1.5 V Size C not standard, operating time up to 40 h
- Net weight approx. 6,5 kg
- Permissible ambient temperature KERN FKB: 10 °C / 40 °C KERN FKB-M: 10 °C / 30 °C

Accessories

- **Protective working cover** over keyboard and housing, standard. Can be re-ordered, scope of delivery: 5 items, KERN FKB-A02S05, **€ 30,-**
- only FKB: **Rechargeable battery pack external**, operating time up to 25 hours with backlight, charging time approx. 10 h, KERN KS-A01, **€ 180,-**
- **Tare pan made of stainless steel**, ideal for weighing loose small parts, WxDxH 370x240x20 mm, for details see page 182, KERN RFS-A02, **€ 55,-**
- **Suitable printers** and further, extensive accessories from page 177 ff.

Bench scale KERN FKT

Alibi memory

- Ring memory for up to 49,152 measuring results (744 measuring results per day!)

- Saved measuring results cannot be changed or cleared. If the maximum memory capacity is reached, then the oldest value will be overwritten

- In addition to the measuring result, the date, time, tare value, a sequential number and the serial number of the balance are also saved.

- Saved measuring results can be searched and recalled easily

- The alibi memory can also be used for applications which do not require verification

- Complies with WELMEC 2.5

Touchscreen industrial scale with enormous range of functions, also with EC type approval [M]

Innovative touchscreen: Large touch-sensitive, backlit screen with very good contrast for easy operation and convenient reading

Advantages:
- The menu and processes are self-explanatory
- No more errors or lost time through keys wich have several functions assigned to them or unclear markings
- Large keys, which can also be operated when wearing gloves
- More efficient, faster and safer working
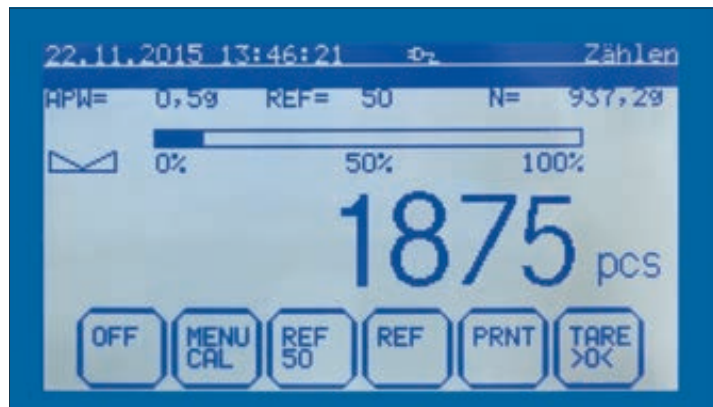

Display at full size, **operating mode counting**

Easy entering of text and values
e.g. item descriptions, user name, weights of tare containers, etc. using the large keypad
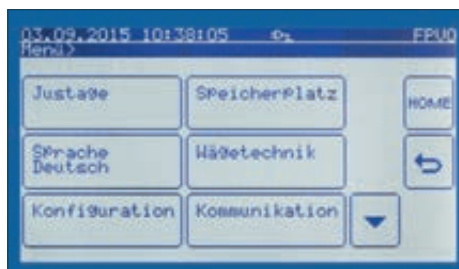

80 memories for each mode (FKT-M: 40)
e.g. for checkweighing, PRE-TARE, reference weight, target weight for dispensing etc.
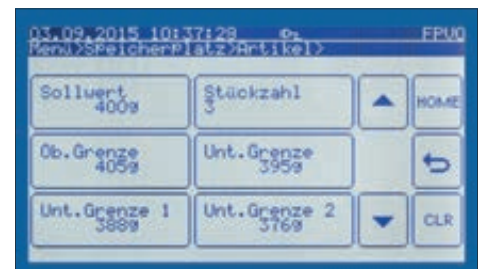

Weighing with tolerance range (checkweighing): a visual and audible signal helps with portioning, dispensing or grading

Bench scale KERN FKT

Features

- **Convenient recipe weighing:** 99 recipes each with 10 components each can be stored in plain text. If one recipe ingredient is overweight, then the practical recipe adjustment function for when dosages are exceeded automatically calculates the new target weights of the other ingredients. The actual and target values and the proportionate percentage can then be printed. The recipes can be generated easily in an Excel list at the PC and transferred to the balance using the RS-232 interface. Alternatively, the recipes can also be entered directly using the keypad
- **Multiplier function:** recipes with the ingredient weights recorded as percentage values can easily be replicated by entering a new target weight. The ideal solution for the preparation of larger containers, bulk packs etc.
- **Rapid function** for shortened stabilisation time with reduced readout
- **16 print forms** which can store up to 20 different information, such as, e.g., date, time, operator, item, net, tare, gross, PCs, target weight, PRE-TARE etc. The print forms can be generated easily in an Excel list in the PC and transferred to the balance using the RS-232 interface
- **Control outputs (optocoupler, digital I/O)** to connect relays, signal lamps, valves etc. (35 V / 80 mA)
- **Hook for underfloor weighing** of hanging loads standard for models with weighing plate size **B**

Technical data

KERN scales – not scared of water at all!

Scales used in industrial situations or the food industry are often exposed to extreme stresses and strains. Water, oils, fats, varnish, dust, dirt, flour, small parts, etc. are all natural enemies of a scale. In industries such as the chemical, pharmaceutical, food, manufacturing industries, etc. scales must be able to cope with these stresses without this affecting their performance.

For use in such harsh environmental conditions, levels of protection are defined, which specify which environmental stresses a system can be exposed to with respect to the level of contact, foreign object and moisture protection, without damage beeing caused to the unit. These levels of protection are described in the following standard: "DIN EN 60529: protecction types through housing"

The IP code usually consists of a two-digit combination, which gives the relevant level of protection, e.g. IP68. The first digit specifies the protection level for contact protection and protection against foreign bodies (dust protection), the second digit is for the water and moisture protection (protection against splashes of water).

All stainless steel components of the IP65...68 protected KERN stainless steel scales are made of corrosion-resistant steel of quality class 1.4301 (DIN X5CrNi18-10). The material properties support you in your ➔ *HACCP*-compliant quality system.

Extract from the standard: "DIN EN 60529: protection types through housing":

KERN-Pictogram	1. digit	Specification	2. digit	Specification
IP 65	6	Dustproof	5	Designed for temporary contact with liquids. Use a damp cloth for cleaning.
IP 66	6	Dustproof	6	Protection against water jets.
IP 67	6	Dustproof	7	Designed for temporary use in wet areas. Temporary submersion is possible.
IP 68	6	Dustproof	8	Designed for continuous use in wet areas. Submersion is possible.

HIGH-LIGHT

Your product specialist's recommendation:

👍 **Scale entirely out of stainless steel**

👍 **Protection against dust and water splashes IP67/68**

👍 **A vast number of platform sizes available**

👍 **Superior display size for the very best readout**

Price computing scales are used wherever the price of goods is calculated dependent on the weight of the goods. These scales are subject to obligatory verification (➔ *Verification*) in accordance with European Directive 2009/23/EC. Usually, are verification class 🅜🎚 scales.

KERN mobile retail scales are compact in size and therefore save space on the sales counter. Thanks to the simple menu structure they are easy to use – saving time and money.

Fitted with mains or rechargeable batteries as standard, price computing scales can be used in retail shops as well as on mobile sales stalls.

All price computing scales from KERN have three displays showing you all important information at a glance:

• Weight display in kg (verifiable)
• Unit price in €/kg or €/100 g
• Total price in €

Even the KERN entry level retail scales have direct access keys for memories (➔ *PLU*). The sales item with the relevant price can be stored against these PLU. In this way, frequently used sales items can called up at lightning speed. This accelerates customer service and reduces waiting times.

➔ *See the glossary on page 214 – 216*

Price computing scale KERN RPB

Application examples:
- retail shops
- market places
- farm shops
- pick your own fruit and vegetable sales

Note: Official verification duty for commercial trade

Retail scale with memories for item prices

Features

- **1 Elevated display** backlit, revolving on column, height of stand approx. 530 mm, only RPB-HM, must be ordered at purchase
- **2 Second display** on the rear of the balance, standard (only with models without the elevated indicator)
- **Three displays** for: weight (verifiable), unit price, total price
- **Unit price can be switched** from €/kg to €/100 g
- **Memory (PLU) for 10 article prices**
- **Auto-clear-key:** Unit price entry is automatically set to zero when scale is unloaded

- **3 High mobility** thanks to its rechargeable batteries (optional) and low weight

Technical data

- Large backlit LCD displays, digit height 20 mm
- Weighing plate dimensions, stainless steel, WxD 294x225 mm
- Overall dimensions WxDxH 320x350x125 mm
- Net weight
  RPB: approx. 3,5 kg,
  RPB-H: approx. 4,7 kg
- Permissible ambient temperature -10 °C / 40 °C

Accessories

- **Protective working cover** standard. Can be re-ordered, scope of delivery: 5 items, KERN CFS-A02S05, **€ 40,-**
- **Rechargeable battery pack internal**, operating time up to 80 h without backlight, charging time approx. 14 h (internal charging via mains adapter). AUTO-OFF function to preserve the battery, can be switched off, KERN GAB-A04, **€ 40,-**
- **Tare pan made of stainless steel**, ideal for weighing loose fruit and vegetables, WxDxH 370x240x20 mm, for details see page 182, KERN RFS-A02, **€ 55,-**
- **Suitable printers** see page 177 ff.

> "Are you recording quantities manually in Goods Inwards? That's old hat. The intelligent KERN PC balance systems are state-of-the-art, and make Goods Inwards and stocktaking simple and uncomplicated. They give precise values, quickly and flexibly and therefore save a lot of time and money."

Interesting facts about density determination

Minimum piece weight
Smallest piece the scale will accept for piece counting and piece count display. In practice, depending on the required accuracy, we recommend to choose a counting scale with a minimum piece weight smaller than the weight of the item to be counted.

➔ *Counting resolution*
Describes the maximum quantity which can be counted with a counting accuracy of 1 %, with a minimum variation of item weights and a sufficiently large ➔ *reference quantity* (20 pieces with counting resolution ≤ 60,000 points, 50 pieces from 60,000 – 150,000 points, 100 pieces ≥ 150,000 points). This therefore is an indication of the quality of the counting scale.

Recommended ➔ *reference quantity*
Weight tolerances of pieces to be counted are the the most significant sources of error when counting. Therefore, at the start of every counting procedure, establish an average weight, the so-called ➔ *reference weight*, by placing several pieces on the scale, the so-called reference quantity. Usually this would be:

5 pieces	>>	often sufficient
10 pieces	>>	common practise
20 – 100 pieces	>>	for large deviations among piece weights

The "automatic ➔ *reference optimisation*" function increases the reference quantity gradually, whereby the average piece weight is optimised step by step. This contributes considerably to the accuracy of the subsequent counting processes.

Which counting scale for which application?

Simple counting scale
with self-explanatory user guidance on the keyboard. The graphic control panel enables you to start working immediately, without having to consult the user manual. Easy handling, value for money.

Professional counting scale
with 3 separate displays for reference weight (average weight of the pieces), total weight of all pieces and total quantity of all pieces. Very useful integrated memories, e.g. for container weight, item number, reference weight as well as audible and visual counting aids and an alphanumeric key pad for easy data entry.

Special tip for counting large quantities:
Counting systems
The weighing ranges of bench counting scales are often not sufficient to count large quantities, units, palletized items, etc. Here high-performance counting systems come into operation, as these combine a high-precision reference scale with a high-capacity bulk scale.

Special stocktaking scales SMT, FKA and FKC
For demanding quantity measurement, e.g. as part of a stocktake. With its easy-to-use touch screen, special stocktaking software and PC connection this makes it quicker to collect and analyse stock levels

Are you looking for higher capacity counting scales?

We have just the right product for you!

All floor scales, pallet scales and drive-through scales from product group 10 (pages 123-139) can be put together to create a high-capacity counting system using the built-in RS-232 or DUAL interface.

Your KERN product specialist for counting scales and counting systems, Mrs Tanja Jetter will be pleased to advise you.

Counting scale KERN CXB

Note: Official verification duty for commercial trade.
The verification only refers to the weight of the counted parts

Entry level model into professional counting, also with EC type approval [M], counting resolution of 30,000 points

Features

- **Precise counting:** The automatic reference weight optimisation of reference weight gradually improves the average piece weight value
- **Programmable using numerical key pad:**
  - required reference quantity
  - known reference weight
- **Three displays** for
  - Total weight (verifiable)
  - Piece weight
  - Total count
- **Audible Fill-to-target:** target quantity or target weight can be programmed. When the target value is reached, a signal will sound
- **Counting results memory:** adds up all individual piece counts, result is shown in total weight and total pieces

- **Energy management:** Backlight turns off after 5 sec
- **Two balances in one:** Changes from counting mode to weighing mode at the touch of a key
- **PRE-TARE function** for manual subtraction of a known container weight, value can be saved

Technical data

- Large backlit LCD displays, digit height 18 mm
- Weighing plate dimensions, stainless steel, WxD 300x225 mm
- Dimensions housing WxDxH 300x330x110 mm
- **Rechargeable battery pack internal**, standard, operating time up to 200 h without backlight, charging time approx. 8 h

- Net weight approx. 4 kg

Counting scale KERN CPB

Note:
Official verification duty for commercial trade. The verification only refers to the weight of the counted parts

Professional model, also with EC type approval [M], counting resolution up to 60,000 points

Features

- **Precise counting:** The automatic reference weight optimisation of reference weight gradually improves the average piece weight value
- **Programmable using numerical key pad:**
  - required reference quantity
  - known reference weight
- **Three displays for**
  - Total weight (verifiable)
  - Piece weight
  - Total count
- **Audible Fill-to-target:** target quantity or target weight can be programmed. When the target value is reached, a signal will sound
- **Counting results memory:** adds up all individual piece counts, result is shown in total weight and total pieces

- **PRE-TARE function** for manual subtraction of a known container weight, value can be saved
- **Energy management:** Backlight turns off after 5 sec
- **Two balances in one:** Changes from counting mode to weighing mode at the touch of a key

Technical data

- Large backlit LCD displays, digit height 20 mm
- Weighing plate dimensions, stainless steel, WxD 295x225 mm
- Overall dimensions WxDxH 320x350x125 mm
- Net weight approx. 3,2 kg
- Permissible ambient temperature 0 °C / 40 °C

Accessories

- **Protective working cover**, can be retrofitted, scope of delivery: 5 items, KERN CFS-A02S05, **€ 40,-**
- **Rechargeable battery pack internal**, operating time up to 90 h without backlight, charging time approx. 12 h, can be retrofitted, KERN GAB-A04, **€ 40,-**

KERN
Stocktaking scales

Stocktaking in an instant

Save valuable time and money with application oriented balance-PC systems for rapid and reliable recording of stock levels. From the simple determination of weights in day-to-day operations, through its beneficial use as a checkweigher in Goods Inwards or picking small parts, to professional recording of your entire stock levels within the scope of a regular inventory – with the **KERN inventory system** you are always in safe hands.

KERN FKA and FKC – 2 trusty helpers

» Barcode scanner can be connected for rapid item recognition

» Easy selection of archived items using the practical search function

» Rapid data transfer, e.g. excel stock lists from PC to the balance or recorded stock levels from the balance to the PC

» It is possible to print out individual item stocks immediately using a printer

» Up to 16 individual receipt print outs (also with company address) can be easily designed on the PC or the balance and archived in the balance

» Used as a counting system the KERN FKC can achieve counting resolutions of up to 5 million parts with a high degree of accuracy

» An inventory system which can be used in any location, and is easy to transport thanks to its compact dimensions and operation on battery or rechargeable battery

Your benefit

• Thanks to the stored item data, such as item name, piece weight, reference quantity, tare values of the packaging or storage boxes etc. this information does not to be recorded during the stocktake. That is a huge time saver

• There is no need for a separate stock list in paper form – which prevents information being entered wro

• When using a barcode scanner, the sources of error in confusion of items is practically eliminated – which ensures process reliability and accurate inventory data

• The recorded item stock can be printed out immediately and then put in the storage box or stuck on using the label printer – item specific with user, item description, date, time and quantity

• Items which are not in the database can easily be recorded on the balance and be transferred onto the stock list – which means the maximum flexibility when stocktaking

• For archived items, daily totals can be determined and transferred to the PC – in this way you are kept informed of the progress of the inventory at all times

• When using the KERN FKC counting system you can achieve extremely high counting resolutions of up to 5 million parts with a high degree of accuracy – which means that inventory data is accurate in just one work process and therefore save a lot of time

Stocktake scale KERN FKA

SCAN ME!

See for yourself just how easy **Goods Inwards** can be, with KERN ...

Stocktake scale with touchscreen to quickly measure the quantity of stock items and transfer the information to the PC

08

Features

- Application-orientated balance-PC system for rapid and reliable recording of stock levels, e.g. as part of a stocktake or goods inwards control
- [1] **Using the software included as standard**, an excel list produced by a PC with stocktake items can be transferred to the balance. In the warehouse, stocktake items can then be weighed, counted and stored by the balance, while still in their containers. In doing this, the stored container weight will be subtracted automatically. After the stocktake, the stock level will then be transferred back to the PC and can then be processed further as an excel table. In this way the amount of work and input at the balance is kept to a minimum and time efficiency is maximised = saves costs
- **High Flexibility:** During stocktaking, stored PRE-TARE can be corrected immediately on the scale. Items which have not yet been recorded can easily entered using the scale and then transferred in the stock level list

- **1000 item memories** for master data, such as item number, PRE-TARE (container weight), reference quantity, refere, weight etc.
- During stocktaking it is possible to print individual items recorded
- Barcode scanner can be connected for rapid item recognition, with no confusion

Technical data

- Backlit and touch-sensitive LCD display with digit height 18 mm, screen diagonal 5.8" (approx. 147 mm)
- Dimensions housing WxDxH 350x390x120 mm
- Optional battery operation, 6 x 1.5 V Size C not included, operating time up to 15 h

Stocktake scale KERN FKC

Quantity scale KERN FKA

Reference scale KERN KB-N

Stocktaking scale with touchscreen to quickly measure the quantity of stock items and information to the PC

Features

- **Counting with a reference balance for high counting accuracy:** the highly accurate KERN FKC counting system can replace a whole range of individual balances, efficiently and at a reasonable price.
- The counting system consists of an FKA bulk scale FKA (see p. 96 for details) and a KB-N reference balance KB-N (details see page 25) as well as an interface cable
- Application-orientated balance-PC system for rapid and reliable recording of stock levels, e.g. as part of a stocktake or goods inwards control
- **Item recognition using the optional barcode scanner is possible**, see accessories
- ▮ **Individual printout templates** can be stored for Weighing Mode and Counting Mode. Can be edited directly at the balance or at the PC
- **Note:** As well as stocktaking, the balance can be used in many other applications, e.g. as a weighing scale, commissioning balance or as a professional counting scale with item

memory for up to 500 items and associated daily totals memory for each item.

Counting system KERN CCS

Quantity scale KERN KFP

Reference scale KERN CFS

Counting system to count the smallest parts in the largest quantities, counting resolution up to 999,999 points

Features

- **This highly accurate counting system** KERN CCS can replace a whole range of individual counting scales, efficiently and at a reasonable price

Reference scale KERN CFS:

- This professional KERN CFS counting scale, which can also be used as a stand-alone scale, meets the highest demands for accuracy, weighing range and volume of items, by beeing connected to a high-capacity weighing bridge

- **Programmable using numerical key pad:**
  - required reference quantity
  - known reference weight
- **Memory (→PLU) for 100 items** with additional text
- **Fill-to-target function:** Programmable target weight. An acoustic and visual signal will be displayed when the target value is reached
- **Precise counting:** The automatic reference weight optimisation of reference weight gradually improves the average piece weight value
- For additional details on the KERN CFS reference scale, see page 91

Quantity scale KERN KFP:

- The high-accuracy quantity counting takes place on the weighing platform (= weighing bridge) KERN KFP
- **Stainless steel weighing plate**, painted steel base with Ⓐ - Ⓔ
- **Aluminium singlepoint load cell** (1 x 3000 e), protection against dust and water splashes IP65
- For additional details on the KERN KFP quantity scale, see page 150

Premium counting system KERN CCP

NEW **PREMIUM ★★★**

Quantity scale KERN KXP

Reference scale KERN ILT

Premium counting system for high-capacity counting applications with the highest level of accuracy, counting resolution up to 6 million points

Easy entering of item data using the connected barcode or RFID scanner

High level of connectivity

- 1 x Ethernet
- 2 x RS-232
- 2 x USB e.g. for data exchange or connecting barcode or RFID scanners
- 1 x WLAN
- Digital I/O (4 in/4 out) e.g. to control machines and plants
- 1 x Interface for additional display

On the basis of the KERN ILT reference balance, you can put together a wide range of high-performance counting systems, for example, with an additional bulk balance, to cover more weighing ranges - your KERN product specialist will be pleased to advise you

Premium counting system KERN CCP

Features

- **This highly accurate counting system** KERN CCP can replace a whole range of individual counting scales, efficiently and at a reasonable price
- **High level of connectivity:** Thanks to a range of integrated interfaces
- **Alibi memory:** Electronic archiving of weighing results, see also page 214
- **Data interface USB** for transferring weighing data to the PC, printer, USB sticks etc.
- **User-friendly batch management**
- **Individual print formats**

Reference scale KERN ILT:

- The counting system is operated using the KERN ILT touchscreen reference balance and offers the full range of functions for demanding counting applications
- This professional touchscreen platform scale KERN ILT which can also be used as a stand-alone scale, meets even the highest demands for accuracy, weighing range and volume of items (up to 6 millions items)
- **Intuitive operation using the touch display** increases efficiency and saves costs
- **Creation and recall items to be counted from the database (8 GB)** with all relevant additional data such as piece weight, name, price (for internal valuation), reference quantity, tare container weight, barcode, item image etc.
- **Fill-to-target function:** Programmable target weight. A visual signal will be displayed when the target value is reached
- **Precise counting:** The automatic reference weight optimisation gradually improves the average value of the piece weight
- For additional details on the KERN ILT reference scale, see page 120/121

Quantity scale KERN KXP/KFP:

- The high-accuracy quantity counting takes place on the weighing platform (= weighing bridge) KERN KXP/KFP. In this way even the smallest of parts can be counted in large volumes
- ▯ **Stainless steel weighing plate,** painted steel base, extremely resistant to bending, wing design, aluminium singlepoint load cell, 3000 e, protection against dust and water splashes IP65
- ▯ **KFP only:** Weighing bridge painted steel, extremely resistant to bending due to material thickness, four load cells, steel, 3000 e, dust and spray protection IP67
- For additional details on the KERN KXP quantity scale, see page 150, KERN KFP, see page 151

Premium counting system KERN CCT

Reference scale KERN PLJ-C

Quantity scale KERN ILT

Premium counting system with EC type approval [M], for complex counting applications with the highest level of accuracy, counting resolution up to 6 million points

Features

- **This highly accurate counting system** KERN CCT can replace a whole range of individual counting scales, efficiently and at a reasonable price
- Thanks to **EC type approval [M]** this counting system can also be used in verified applications, e.g. for order picking packaged items, etc.
- **Alibi Memory:** Paperless archiving of up to 100,000 weighing results For weighings where verification is mandatory, and which are to be analysed and processed by a PC, the legislative body requires electronic archiving using a verifiable, non-manipulatable data memory

- **High level of connectivity:** Thanks to a range of integrated interfaces
- **Data interface USB**: for transferring weighing data to the PC, printer, USB sticks etc.
- **Individual print formats:** Printouts can be individually adjusted depending on operating mode, application or your own requirements, directly at the balance or the PC

Reference scale KERN PLJ-C/AEJ-C:
- The highly accurate reference balances KERN PLJ-C and AEJ-C determine the piece weight of items to be counted with the highest level of precision

- These precision balances, which can also be used as individual balances, can fulfil even the highest level of requirements for accuracy, weighing range and volume of items (up to 6 million items) through connection to a high-capacity platform scale
- **Automatic internal adjustment** in the case of a change in temperature ≥ 3 °C or time-controlled every 3 hours, guarantees high degree of accuracy
- **Internal memory** for up to 999 weighing results, 1000 items, 100 container weights, 100 users
- For additional details on the KERN PLJ-C reference scale, see page 33, KERN AEJ-CM, see page 48

Premium counting system KERN CCT

Quantity scale KERN ILT:
- The high-accuracy quantity counting takes place on the platform scale KERN ILT
- The counting system is operated using the premium display device of the KERN ILT bulk balance and offers the full range of functions for demanding counting applications
- **Intuitive operation using the touch display** increases efficiency and saves costs
- **Creation and recall items to be counted from the database (8 GB)** with all relevant additional data such as piece weight, name, price (for internal valuation), reference quantity, tare container weight, barcode, item image etc.
- **User-friendly batch management**
- **Fill-to-target function:** Programmable target weight. An acoustic and visual signal will be displayed when the target value is reached
- **Precise counting:** The automatic reference weight optimisation gradually improves the average value of the piece weight
- Thanks to its wide range of functions and large database, this touchscreen platform scale, which can also be used as individual scale, is particularly suitable for complex recipe or checkweighing applications, as well as classic counting and weighing applications
- For additional details on the KERN ILT quantity scale, see page 120/121

Industrial scales

In the KERN range there are portable, affordable entry level models for weighing post or parcels, high-quality models with a high ➔ **IP protection** and type approval (➔ **Verification**) for commercial trade applications, up to top level models with touchscreen technology for complex recipe or check-weighing applications with relay control – there is the right platform scale for each application.

Platform scales benefits are obvious:

- Weighing range from 3 kg – 600 kg
- Robust platform construction for harsh industrial applications
- Versatile, available with stand
- High overload protection
- Stainless steel weighing plate, shock proof and easy to clean
- Display device can be positioned separately, e.g. wall-mounted, on a stand or next to the platform. This guarantees for an always clear view on the display despite bulky items on the scale
- Large selection of platform sizes

In order to meet the various requirements of our industrial customers, KERN platform scales have a large number of practical functions. From counting and recipe functions via ➔ **data interfaces** (RS-232, RS-485, USB, Bluetooth, WLAN, Ethernet) for connecting scales to a network, PC or printer to the useful battery or recheargable battery operation for mobile use. The „Hold function" is particularly useful for industrial weighing and guarantees stable results even in turbulent locations or when weighing animals – a true all-rounder.

The newest development for an even greater level of user-friendliness is the wireless communication between platform and display device, giving the highest level of flexibility – weighing at the location of use of installation and read the weight up to 20 m away.

Particularly practical: the touchless tare function allows for taring the scale without having to touch it by using movement sensors. This is useful when working with gloves or dirty hands, see page 109, 120.

Parcel scale KERN DE-D

The long lasting story of success with dust and spray protected display device

Piece counting

Animal weighing
Recipe weighing

Features

- **High mobility:** Battery or rechargeable battery (optional) operation, compact and flat construction and low weight make this scale ideal for use in several locations (production, warehouse, dispatch department etc.)
- **Flexible positioning of display device:** e.g. free-standing or mounted to the wall (optional)

- **1 Display device IP65.** Protected against dust and spray (only when using battery or rechargeable battery pack)
- **Stainless steel weighing plate**, painted steel base
- **PRE-TARE function** for manual subtraction of a known container weight, useful for checking fill-levels

- With the **recipe function** you can weigh the different ingredients of a mixture. As a check, you can also call up the total weight of all the ingredients
- **Freely programmable weighing unit**, e.g. display direct in special units such as length of thread g/m, paper weight g/m^2, or similar

Platform scale in heavy version with EC type approval [M], now also up to [Max] 600 kg

Features

- **Industrial quality:** because of its stable construction and robust design, it is ideal for continuous use in an industrial environment
- **1 Platform:** Weighing plate stainless steel, painted steel base, protection against dust and water splashes IP65, silicone-coated aluminium load cell, details see page 150
- **Display device:** Superior display size, digit height 52 mm for the easy reading of weighing results, even under poor lighting conditios. For details see page 147, KERN KFB-TM

- **Benchtop stand incl. wall mount** for display device as standard
- **Level indicator and levelling feet** for precise levelling of the scale, fitted as standard, to give the most accurate weighing results
- **Weighing with tolerance range (checkweighing):** Input of an upper/lower limit value. A visual and audible signal assists with portioning, dispensing or grading
- **Totalising** of weights and piece counts

- **Hold function:** When the weighing conditions are unstable, a stable weight is calculated determining an average value
- **New:** high-resolution models for high-precision weighing and models with a weighing range of 600 kg!

Precision platform scales KERN DS · DS-M

- Cable length of display device
  A, B approx. 2 m
  C approx. 0,6 m
- Permissible ambient temperature DS:
  10 °C / 40 °C; DS-M: 10 °C / 30 °C

Precision industrial scale with laboratory accuracy, also with EC type approval [M] class II

Features

- **High-capacity precision balance**, ideal for high volume or heavy samples to be weighed with a high degree of accuracy
- **User guidance step by step** on display by Yes/No dialogue
- **Numerical subtraction of tare weight** for known container weight. Useful for checking fill-levels
- **Precise counting:** The automatic reference weight optimisation of the reference weight gradually improves the average piece weight value

- **only DS:** Freely programmable weighing unit, e.g. display directly in special units such as length of wire g/m, paper weight g/m^2, or similar

IP protected platform scale KERN IXS

Platform scale with stainless steel display device with IP68 rating, XL-display und EC type approval [M] – now also as high resolution version with high-resolution display

Piece-counting function

Durable stainless steel weighing plate

Stainless steel display device with IP67 protection, hygienic and easy to clean

IP protected platform scale KERN IXS

Features

- **Tough industry standard** suitable for use in harsh industrial applications
- **Display device:** Stainless steel, very high class of protection against dust and water IP68, for industrial applications, hygienic and easy to clean, with integrated power supply. Wall mount standard. For additional information see page 148, KERN KXS-TM
- **1 Flexible positioning of display device:** e.g. free-standing or mounted to the wall
- **Superior display size:** digit height 55 mm. Bright backlight for easy reading of weighing results, even in poor lighting conditions
- **2 Platform:** weighing plate stainless steel, substructure in wing design, extremely resistant to bending, steel, lacquered, protection against dust and water splashes IP65, silicone-coated aluminium load cell

- **ESD drain to protect against electrostatic discharge** e.g. for electrostatically-charged weighing objects or people who work with the scale
- Thanks to the RS-232, RS-485 and Bluetooth (optional) interfaces, the scale can easily be connected to existing networks. Data exchange between the scale, PC or printer

Alibi memory

- Ring memory for up to 49,152 measuring results (744 measuring results per day!)

- Saved measuring results cannot be changed or cleared. If the maximum memory capacity is reached, then the oldest value will be overwritten

- In addition to the measuring result, the date, time, tare value, a sequential number and the serial number of the balance are also saved.

- Saved measuring results can be searched and recalled easily

- The alibi memory can also be used for applications which do not require verification

- Complies with WELMEC 2.5

Touchscreen platform scale with enormous range of functions, available also with EC type approval [M]
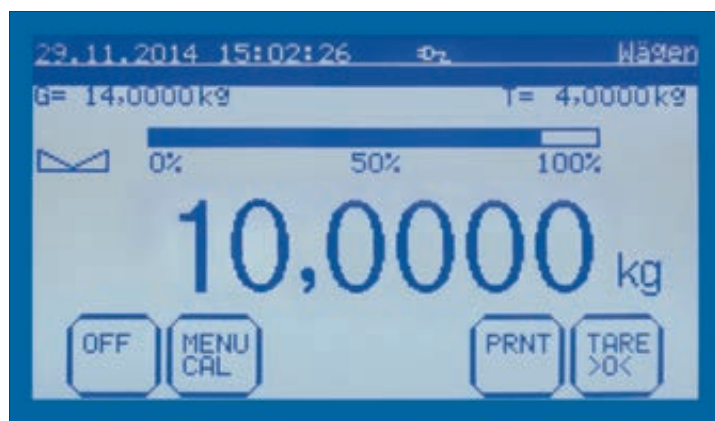

Display at full size, **operating mode weighing**

Innovative touchscreen: touch-sensitive, backlit screen with very good contrast for easy operation and convenient reading

Advantages:
- The menu and processes are self-explanatory
- No more errors or lost time through keys wich have several functions assigned to them or unclear markings
- Large keys, which can also be operated, when wearing gloves
- More efficient, faster and safer working

Platform: Weighing plate stainless steel, painted steel base A, B, D, aluminium casting D, protection against dust and water splashes IP65, silicone-coated aluminium load cell
Easy entering of text and values
e.g. item descriptions, user name, weights of tare containers, etc. using the large keypad

80 memories for each mode
e.g. for checkweighing, PRE-TARE, reference weight, target weight for dispensing etc.

Professional counting function
All relevant counting information at a glance, such as, e.g., reference weight, reference quantity, total count, total weight, tare container weight, available weighing range and much more

Industrial platform scale KERN IKT

Features

- If one recipe ingredient is overweight, then the **practical recipe adjustment function** for when dosages are exceeded automatically calculates the new target weights of the other ingredients. The actual and target values and the proportionate percentage can then be printed
- **Multiplier function:** recipes with the ingredient weights recorded as percentage values can easily be replicated by entering a new target weight. The ideal solution for the preparation of larger containers, bulk packs etc.
- **Rapid function** for shortened stabilisation time with reduced readout
- **Control outputs** (optocoupler, **digital I/O**) to connect relays, signal lamps, valves etc.

User-friendly piece-counting function: creation and recall items to be counted from the database with all relevant additional data such as piece weight, name, price (for internal valuation), reference quantity, tare container weight, barcode, item image etc. Also integrated: automatic reference optimisation, correction of reference weights, freely selectable reference quantity and much more **Note:** on the basis of the KERN ILT range, you can put together a wide range of high-performance counting systems - your KERN product specialist will be pleased to advise you

Backlit and touch-sensitive LCD display with digit height 21 mm, screen diagonal 5,7" (145 mm), WxH 115x86 mm. Dimensions of display device WxDxH 215x156x71 mm. Thanks to the interactive touch display, the menu and processes are self-explanatory. This reduces the training times, avoids operating errors and in this way, ensures more efficient functionality

Intuitive operation, increases efficiency and saves costs: Easy capture of item data at the PC, call up of items on the balance using the connected barcode or RFID scanner, output of weighing data using the large or second display or control outputs, data transfer to the PC, printer or alibi memory.

Identification by RFID: rapid and secure identification of users, items, vehicles, etc. using the optional RFID transponder card reader. The data can be read and edited (suitable for ILT-BAM, -GAM, KXE-TAM)

Item recognition using the optional barcode scanner is possible, see accessories. Ideal for rapid recording of items, e.g. as part of a stocktake or to record recipe ingredients as part of a recipe etc.

Platform scale KERN ILT

Features

- **Convenient recipe-weighing:** complete recipes with all recipe ingredients and associated target values, names, tolerances, tare weights etc. can be stored. If there is an excess amount of one recipe ingredient the practical back calculation function automatically calculates the new target weights of the other ingredients
- **Multiplier function:** recipes with the ingredient weights recorded as percentage values can easily be replicated by entering a new target weight. The ideal solution for the preparation of larger containers, bulk packs etc.
- **Best-before dates** can be stored and printed for each item
- **Statistical function** for statistical analysis of series of measurements
- **User-friendly batch management** with batch master and batch number assignment, classification, batch derivation, batch determination, batch status management, shelf-life processing, documentary, original and WIP batches, batch-specific units of measure, batch where-used list
- **Individual user settings can be stored:**
  - User name and number
  - Password
  - Menu language
  - User profile
  - Additional guest mode for users without log-in
  - Authorisations
- **Enormous database** for thousands of weighing results, items, recipes, recipe ingredients, container weights, user data etc. ILT-BAM, -GAM: 8 GB, ILT-NM,-C: 1 GB
- **Alibi memory:** paperless archive of weighing results, see page 214

- **Electronic level indicator** continuously checks the position of the balance, sounds an alarm when the device is out of balance and gives visual instructions on how to correct the situation (only ILT-NM, -C)
- **High level of process reliability:** you can define limit values for selected parameters, such as temperature, levelling, minimum load, adjustment, etc. When the value limit exceeds or falls below, a warning message will be issued and this can be stored with the measuring result
- **Individual print formats:** Printouts can be individually adjusted depending on operating mode, application or your own requirements, directly at the balance or the PC.

Technical data

- Cable length of display device ILT-BAM approx. 2,5 m; ILT-GAM, -NM, -C approx. 1 m

Precision platform scales KERN ILS-C · ILJ-C

PREMIUM ★★★

High-resolution industrial scale, available also with internal adjustment and EC type approval [M]

09

Features

- **Laboratory scale with separate display device:** Ideal when working in a glove bag or under laboratory fume hoods. Particularly practical for weighing toxic, volatile or contaminated substances
- **1** Particularly suitable for compact, very dense samples, e.g. those in road construction or the construction industry
- **Robust construction of platform** ensures stability, protects the weighing system and is durable enough for with everyday use
- **2** only KERN ILJ-C: **Automatic internal adjustment** in the case of temperature change ≥ 3 °C and time-controlled every 3 hours
- **Alibi memory:** paperless archive of weighing results, see page 214

- **Internal memory** for up to 999 weighing results, 1000 items or recipe ingredients, 100 container weights, 100 users
- **PRE-TARE function** for manual subtraction of a known container weight, useful for checking fill-levels
- **Weighing with tolerance range (checkweighing):** a visual signal helps with portioning, dispensing or grading
- **Totalising** of weights (manual/automatic)
- **GLP/ISO record keeping of weight values** with date, time, user ID, project and serial number in combination with an appropriate KERN printer
- **Density determination** of liquids and solids. Step by step user guidance on display. The density is indicated directly on the display. Note: For interesting facts about density determination see page 214
- **Hook** for underfloor weighing standard

Technical data

- Large backlit LCD display, digit height 18 mm
- Dimensions of weighing plate WxD 347x259 mm
- Dimensions of display device WxDxH 270x165x115 mm
- Permissible ambient temperature 10 °C / 40 °C

Accessories

Robust aid for weighing large loads

KERN offers a carefully coordinated range from affordable entry level models, to practical built-in solutions, up to the top level verified models made of stainless steel. Their common feature is the long-lasting industrial quality as well as the high level of protection against dust and spray.

The installation, startup, and possible verification of floor, pallet, and drive-through scales require specialised knowledge, which is the basis for a successful sale. Please ask for our "Floor scale info sheet".

High-capacity scales – ideal for piece counting with large item quantities

The weighing ranges of bench counting scales are often not sufficient to count large quantities, units, palletised items etc. This is where high-performance counting systems are employed as these combine a high-precision reference balance with a high-capacity bulk scale, such as e.g. floor scales, pallet scales or drive-through scales. Your personal KERN customer consultant will be happy to help you setting up the right high-capacity counting system.

Individuality is the trump card

Do you have any special requests, which are not covered by our extensive floor scale range? Then why not configure your ideal model yourself, it's quick, individual and affordable.

Of course we can also offer you the complete service and put the required scale combination together for you, including verification. All further details can be found from page 177 ff. or ask your personal customer service agent, he will be pleased to advise you

Your product specialist's recommendation:

👍 **Massive steel weighing bridge with IP65 protection**

👍 **Stainless steel display device with IP68 protection**

👍 **Screwed on weighing plate, easy to remove, hygienic and easy to clean**

Weighing bridge with screwed on weighing plate (IP67) and XXL display device, with EC type approval [M]

Features

- **1 Weighing bridge:** steel, lacquered, weighing plate size C, D corrugated steel plate, protection against dust and water splashes (IP67), 4 silicone-coated steel load cells. Weighing bridge can also be delivered as components without the display device KERN KFP V20 IP67 protection, details see page 151
- **1 Weighing plate A B screwed on from the top**, so it's easy to remove, hygienic and easy to clean
- **Easy levelling of the weighing bridge** as well as **access to the junction box** from above
- **Comfortable adjustment of the weighing bridge** from above
- **Display device KERN KFB-TM**, details see page 147
- **Benchtop stand incl. wall mount** for display device as standard
- **Totalising** of weights and piece counts

Technical data

- Large backlit LCD display, digit height 52 mm
- Weighing plate dimensions WxDxH

- A 1000x1000x80 mm, B 1500x1250x80 mm
  C 1500x1500x80 mm
  D 1500x1500x130 mm, welded
- Dimensions of display device WxDxH 250x160x58 mm
- Cable length of display device approx. 5 m
- Permissible ambient temperature -10 °C / 40 °C

Accessories

- **Protective working cover** over the display device standard. Can be re-ordered, scope of delivery: 5 items, KERN KFB-A02S05, **€ 35,-**
- **2 Signal lamp** for visual support of weighing with tolerance range, for details see page 181, KERN CFS-A03, **€ 250,-**
- **3 Stand** to elevate display device, height of stand 750-1000 mm, KERN BFS-A07, **€ 120,-**
- **Pair of base plates** to fix the weighing bridge to the floor, for models with weighing plate size A, B, C KERN BFS-A06N, **€ 60,-**
  D KERN BFS-A10, **€ 60,-**
- **4 Stable pit frame** for weighing bridge installation, allowing for easy access, for models with weighing plate size WxD A 1085x1085 mm, KERN BFS-A03N, **€ 210,-**

  B 1335x1585 mm, KERN BFS-A04N, **€ 250,-**
  C 1585x1585 mm, KERN BFS-A08, **€ 250,-**
- **Rechargeable battery pack internal**, operating time up to 35 h, charging time approx. 10 h, must be ordered at purchase, KERN KFB-A01, **€ 35,-**
- **Ascending ramp**, not included, for models with weighing plate size WxDxH
  A 1000x760x85 mm, KERN BFS-A01N, **€ 300,-**
  B 1250x870x85 mm, KERN BFS-A02N, **€ 350,-**
  C 1500x760x85 mm, KERN BFS-A09, **€ 410,-**
  D 1500x750x121 mm, KERN BFS-A11, **€ 500,-**
- **Large display with superior display size**, digit height 76 mm. WxDxH 541x55x180 mm, details see page 181, KERN YKD-A02, **€ 215,-**
- **Cable with special length 15 m**, between display device and platform, for verified models, this must be ordered at the time of purchase, KERN BFB-A03, **€ 160,-**
- **Suitable printers** and further, extensive accessories from page 177 ff.

Weighing bridge with screwed on weighing plate (IP67) and stainless steel display device (IP68), with EC type approval [M]

Features

- **Industrial quality:** heavy version for tough usage in industrial applications
- **1 Weighing plate screwed on from the top,** so it's easy to remove, hygienic and easy to clean
- **2 Weighing bridge:** Lacquered steel, extremely resistant to bending due to material thickness, protection against dust and water splashes IP67, 4 silicone-coated steel load cells. Weighing bridge can also be delivered as components without the display device, KERN KXP V20 IP67, information on page 150
- **Easy levelling of the weighing bridge** as well as **access to the junction box** from above
- **3 Display device:** stainless steel, protection against dust and water splashes IP68, for industrial applications, hygienic and easy to clean, **with integrated power supply** and superior display size. The display device can

also be delivered as a component without the weighing bridge, KERN KXS-TM, information on page 148
- **Benchtop stand incl. wall mount** for display device as standard
- **Totalising** of weights and piece counts
- Thanks to the RS-232, RS 485 and Bluetooth (optional) interfaces, the balance can easily be connected to existing networks. Data exchange between the balance and PC or printer is also made easier

Technical data

- Large backlit LCD display, digit height 55 mm
- Dimensions of display device WxDxH 232x170x80 mm

Weighing beams KERN UFA

Highly versatile weighing beams (IP67) for large loads to 6 t

Features

- Flexible solution for weighing large, bulky or long items
- **High mobility:** thanks to battery operation (optional) and compact, flat construction, it is suitable for use in several locations (production, warehouse, dispatch department etc.)
- 1 **Weighing beams:** steel, lacquered, protection against dust and water splashes (IP67), 4 silicone-coated stainless load cells. Weighing beams can also be delivered as components without the display device, KFA V20, details see page 152
- **Sturdy handles** for transporting the weighing beams
- 2 Models with suffix-L: Each weighing beam has a roller and handle for easy transport of the scale
- **Display device: KERN KFB-TM**, details see page 147
- **Benchtop stand incl. wall mount** for display device as standard
- **Totalising** of weights and piece counts

Technical data

- Large backlit LCD display, digit height 52 mm
- Dimensions of display device WxDxH 250x160x130 mm
- Cable length of display device approx. 5 m
- Cable length weighing beams approx. 2,5 m
- Permissible ambient temperature -10 °C / 40 °C

Accessories

- **Protective working cover** over the display device standard. Can be re-ordered, scope of delivery: 5 items, KERN KFB-A02S05, **€ 35,-**
- 3 **Stand** to elevate display device, height-adjustable, height of stand 750-1000 mm, KERN BFS-A07, **€ 120,-**
- **Rechargeable battery pack internal**, operating time up to 35 h, charging time approx. 10 h, must be ordered at purchase, KERN KFB-A01, **€ 35,-**

! Shipment via freight forwarder. Please ask for dimensions, gross weight, shipping costs

- **Signal lamp** for visual support of weighing with tolerance range. For details see page 181, KERN CFS-A03, **€ 250,-**
- **Large display with superior display size**, digit height 76 mm. WxDxH 541x55x180 mm, for details see page 181, KERN YKD-A02, **€ 215,-**
- **Y-cable** for parallel connection of two terminal devices to the RS-232 interface on the scale, e.g. signal lamp and printer, KERN CFS-A04, **€ 35,-**
- **Cable with special length 15 m**, between display device and platform, must be ordered at purchase, KERN BFB-A03, **€ 150,-**
- **Suitable printers** see page 177 ff.

" **W**hether it's in the office, in production or dispatch, KERN platform scales will prove their worth in all areas of an industrial environment. Designed to be durable and with highly-accurate weighing results they will become an indispensable assistant in the workplace. "

Jürgen Boschanski, KERN Logistics

Over the legal limit!

Axle load or wheel load scales are an ideal weighing solution for mobile weighing of trucks, trailers, small aircrafts etc. on a non-verified basis.

Mobile axle load scales are often used to give indicative measurements, in particular on building sites, during harvest time in the agricultural industry or in the field of traffic monitoring, in order to establish whether vehicles are overloaded or incorrectly loaded. If such measurements will show inconsistencies, a second measurement can be carried out on a verified vehicle scale.

Compared with fixed vehicle scales, axle load scales are usually more affordable. They not require costly installation and with their compact dimensions and low weight they clearly score highly in terms of mobility.

Using the convenient software in the KERN axle load scales, individual axles can be weighed quickly and easily, one after another. When connected, the various weights at the individual wheels, the weight of the axle or the total weight of the vehicle can be displayed and transferred to the printer.

Thanks to its compact design with a depth of just 50 cm and the equalisation platforms, two axles can be weighed individually, even if they are installed to one another.

Alternatively the innovative design of the weighing pad allows for 2 axles to be measured at the same time and the results to be added when these 2 axles are installed right next to each other. This double construction is also recommended for vehicles or trailers with exceptionally large wheels.

The modular construction of the KERN VHP facilitates enable a wide... wide range of different combination and can therefore be adapted quickly to suit the on-site conditions:

Features

- **Mobile axle load scale for rapid monitoring of vehicles.** Space-saving and affordable. Ideal for mobile police or customs checks, on landfill sites, gravel works, biogas plants etc.
- **1 Display device with integrated thermal transfer printer and rechargeable battery pack** in stable, lined transport case standard. 4 quick-release connectors to connect up to 4 weighing pads. The weighing results from the individual weighing pads can be issued individually or cumulatively KERN VHP-T, **€ 1900,-**
- **2 Weighing pad (wheel load plate) extremely resistant to bending because of its high material thickness.** Particularly flat design, only 35 mm. Brackets for access ramps and spacer plates on both sides, and therefore quickly expendable
  - 2 rollers and 2 handles for easy transport of the weighing pad
  - 6 load cells, aluminium, **silicone-coated**, IP65

Technical data

- Net weight for each weighing pad approx. 30,2 kg
- Net weight of each access ramp approx. 12 kg
- Net weight display device (case) approx. 9,2 kg
- **Rechargeable battery pack internal**, standard, operating time up to 13 hours with backlight without use of printer, charging time approx. 12 h. Can be re-ordered, KERN HFM-A01, **€ 50,-**
- Cable length of display device approx. 10 m
- Permissible ambient temperature -40 °C / 70 °C
- **Scope of supply:**
  - **2 weighing pads (wheel load plates)**
  - **4 access ramps**
  - **1 display device in stable transport case**

Note: The standard scope of supplies (see technical data) can be expanded with further weighing pads, ramp extensions and balancing platforms (see accessories) and in this way the system can be adapted to cover a wide range of applications.

Individuality is the key

Do you have special requests, which are not covered by our exten-sive balance range? Then why not configure your ideal model yourself, it's quick, individual and affordable.

The choice is yours:

- Choose one of the many KERN weighing bridges, pallet scales or drive-through scales and combine these with one of the many KERN display devices
- Combine your weighing bridge with a KERN display device
- Combine your display device with a KERN weighing bridge

Have your ideal scale verfied – with KERN

To help you obtain a verified individual scale combination KERN offers you full support, such as for example

- Issuing of ➔ *proof of compatibility*, see page 145
- Support in preparing for verification, EC type approval, installation conditions
- Issuing of ➔ *declaration of conformity* upon the executed ➔ *conformity evaluation* (manufacturer's initial verification)

Of course there is also the complete service available for you and we set up the required scale combination including verification. All further details can be found on the following pages. Your personal customer consultant will be pleased to assist you, too.

Putting together individual weighing systems which cannot be verified

KERN offers a range of KERN display devices and KERN weighing units, such as platform scales, floor scales, pallet scales and drive-through scales, which you can put together to make your ideal scale. You choose the components, KERN handles the rest.

Assembly
KERN delivers the complete scale which is ready to use.
Prices for assembly can be found in the "Assembly" price table.
On request we can also produce a calibration certificate in accordance with DAkkS/DKD at an additional price, see page 209

Putting together individual weighing systems which can be verified or are verified

In order to provide the complete package, as well as assembling your individual weighing system, KERN will also carry out the manufacturer's initial verification/evaluation for conformity in accordance with EC directives as a commercial scales of verification class III.

In accordance with the verification regulations, when assembling a display device with a weighing unit you must take the following notes into account:

• Only elements which can be verified with build-type approval or OIML test certificate can be combined into a weighing system which can be verified. With KERN these are labelled with "M".
• Platforms with load cells, provided as third-party products which have an OIML test certificate can be included.
• It will not be possible to carry out verification at a later date, e.g. after assembly and delivery of the weighing system. So please order the verification at the same time as you order the weighing system.

The individual KERN steps:

	Weighing range	Model	Price excl. of VAT, ex works
1. Proof of compatibility This is mandatory by law and includes testing by using build-type approvals, whether the connection values of the display device match the connection data of the weighing unit.	0 up to ... kg	**KERN**	**€**
	all weighing ranges	**965-240**	**45,-**
2. Assembly After testing for suitability, using the proof of compatibility, the weighing system will be wired by KERN. The weighing system will then be adjusted, tested and prepared for verification in accordance with verification regulations.	up to ≤ 50 kg	**965-411**	**70,-**
	up to ≤ 350 kg	**965-412**	**100,-**

Weighing and transporting – just one operation

Speed up your warehouse and dispatch processes with the KERN pallet truck scales.

Get the exact weight of a load and at the same time, transport it to a specific location, all in one operation. This reduces commissioning times and avoids queues in front of fixed floor scales.

These mobile weighing solutions are space-saving and deliver reliable weighing results. Differences between given and actual weights can be determined quickly e.g. in the goods-in and out department. This uncovers inaccurate quantities, saves time and money and therefore ensures a very short amortisation period of the scales original cost.

KERN offers a carefully coordinated range from the affordable entry level model to the comfort model with printer and removable battery pack.

KERN pallet truck scales are of robust industrial quality, with high-level protection against dust and water splashes, with high-contrast, easy-to-read displays as well as solid wheels and load rollers – all this helps to give you practical support in your work – day after day.

Of course, all KERN pallet truck scales can also be calibrated and delivered with a DAkkS calibration certificate (optional). This ensures the high level of accuracy of your pallet truck scale.

Pallet truck scale KERN VHE-A

Entry-level model into mobile weighing

Features

- **Highly versatile for general checkweighing**, e.g.: plausibility check at goods receiving, determining shipping weights, avoiding overloads, safety checks
- **Very manoeuvrable** thanks to its compact construction and low weight
- **Particularly robust** with its components having been relocated from the load fork into the protected housing area. It is therefore also ideal for heavy applications in the production area and on board lorries
- **A Display device:** Protection against dust and water splashes IP65
- **Low height of the loading forks** easy uplifting to work with low pallets
- **Pivot range 206°**
- **Castors:** Solid rubber on aluminium rims
- **Load rollers:** Polyurethane

- **Operation**:
  1 Switch on and then pump up the load fork to the reference height
  2 Tare off
  3 Release the load fork and load the goods to be weighed
  4 Weighing: Pump the load fork with the goods to be weighed up to the reference height, read off the weight
- **Ready for use**: Batteries included 2 x 1.5 V AA. AUTO-OFF function to preserve the batteries. Operating time approx. 1 year/approx. 3000 weighings. Charge status indicator on display

TÜV-tested safety

KERN puts great emphasis on safety. For your safety, all KERN hanging and crane scales are subject to a stringent load test in accordance with EN 13155 and EN 61010-1 industry standards.

New in the KERN crane scale range: Compact crane scales/load receptors/tensile dynamometers – KERN HFA and HFC.

As well as the classic crane scales, we also have electronic tensile dynamometers which are extremely versatile thanks to their stable, compact construction. They can, for example, be fitted into testing machines, used for checking for overload, for bracing and tensile force measurement, etc.

This type of device is ideally suited for use between shackles or with a test bench. This is where the benefit of this construction comes to the fore, as the tensile force can be applied in both directions. These compact crane scales are also particularly suitable when weighing suspended loads where space is tight.

At the core of this construction is a robust load cell. Through the absence of moving parts, these balances are practically maintenance and wear free.

Tip

DAkkS calibration certificates (DKD) for crane scales up to 12 t

Do you use crane scales in ISO-certified processes? Then we can produce the right calibration certificate for your measuring device. Thanks to a modern crane scale test unit, we can calibrate crane scales and force-measuring devices from any manufacturer to a maximum load of up to 12 t or 120 KN. You can find all the important details on pages 209, 213 or directly from one of our calibration specialists, we will be pleased to help you.

Your product specialist's recommendation:

👍 **For loads up to 10 tonnes**

👍 **High-contrast display for optimum readability from a distance**

👍 **TÜV-tested safety**

Hanging scales KERN HDB-N · CH

KERN HDB-N

KERN CH

Convenient, economical and always handy

Features

- With the TÜV certification mark, the scale meets the requirements of the standard EN 13155 (Non-fixed load lifting attachments/ Breakage resistance) and EN 61010-1 (Electrical safety)
- Ideal for rapid control in goods-in and goods-out
- Also essential in the private sector to determine the weight of fish, game, fruits, bicycle parts, suitcases etc.
- **Hold function:** For easy reading of the weighing result, the display can be „frozen" in different ways. Either automatically when the weighing value remains unchanged or manually by pressing the Hold key

Technical data

HDB-N:
- **Hook (stainless steel)**, can be hinged
- **Ready for use:** Batteries included 2 x 1.5 V AAA, operating time up to 180 h, AUTO-OFF function to preserve the battery, can be switched off
- Further weighing units: kg, lb, N
- Permissible ambient temperature 5 °C / 35 °C

CH:
- **Hook (stainless steel)**
- **Tape measure**, extractable, length approx. 100 cm
- **Peak load display** (peak hold), measuring frequency 5 Hz

- **Ready for use:** 9 V block included, operating time up to 20 h. AUTO-OFF function to preserve the batteries, can be switched off
- Further weighing units: kg, lb, N
- Permissible ambient temperature 5 °C / 35 °C

Accessories

- **Tare pan with retaining bracket** suitable for KERN HDB-N and KERN CH 15K20, for details see page 182, KERN CH-A01N, **€ 67,-**

Crane scale KERN HFA
Compact crane scale with integrated display can also be used for tensile force measurement

Features

- ▐1▐ With the TÜV certification mark, the scale meets the requirements of the standard EN 13155 (Non-fixed load lifting attachments/ Breakage resistance) and EN 61010-1 (Electrical safety)
- With its high-quality finish, low weight and compact dimensions, this crane scale (tensile force gauge) is an essential device for industrial use, on building sites, in freight centres, ports etc.
- Because of its compact design it is also ideally suited for installation in systems where space is limited, etc.
- Ideally suited for determining weight quickly while loading and unloading

- **Peak load display** (peak hold)
- **Hold function:** When the weighing value remains unchanged the weight indicated on the display is automatically „frozen" until the HOLD key is pressed
- **Tare:** Resets the display to „0" when there is a load on the scale. Now removed or added loads are directly displayed

Technical data

- Large backlit LCD display, digit height 23 mm
- Material and design of housing/load support, models with
  [Max] ≤ 3 t: aluminium/stainless steel bearing
  [Max] > 3 t: steel/steel

- Rechargeable battery pack internal, standard. Can be re-ordered, KERN HFA-A01, **€ 40,-** operating time up to 30 h, charging time approx. 12 h, internal charging via mains adapter, charge status indicator on display
- Optional battery operation, 3 x 1.5 V AA not included, operating time up to 40 h

Crane scale KERN HFT

PREMIUM
★★★
Robust industrial crane scale up to 15 t with radio display and RS-232 data interface for transferring weighing results

Features

- **1** With the TÜV certification mark, the scale meets the requirements of the standard EN 13155 (Non-fixed load lifting attachments/ Breakage resistance) and EN 61010-1 (Electrical safety)
- **Professional device for robust applications** in production, quality control, logistics etc. Because of its stable steel construction and robust design, it is ideal for continuous use in industrial applications
- **Weighing unit without display**, therefore very robust
- **Hold function:** When the weighing value remains unchanged the weight indicated on the display is automatically „frozen" until the HOLD key is pressed
- **Hook with safety catch**, revolving

- **2** **Display with integrated radio module**, in this way the weighing data can easily be read off the display by the user, even if the user might find himself in a remote distance from the crane scale. Range up to 100 m. The integrated RS-232 data interface allows from connection to a printer, PC or network

Technical data

- Separate display with large, backlit LCD display, digit height 22 mm. Dimensions WxDxH 175x135x39 mm, incl. antenna WxDxH 240x135x55 mm
- Precision: 0,2 % of [Max]
- Permissible ambient temperature 0 °C / 40 °C

Accessories

- **Rechargeable battery pack internal**, standard. Can be re-ordered, scale: operating time up to 80 h, charging time approx. 8 h. Can be re-ordered, KERN VFB-A02, **€ 40,-** display device: operating time up to 40 h, charging time 4 h. Can be re-ordered, KERN GAB-A04, **€ 40,-**
- **Interface cable RS-232**, to connect the display device to a printer, PC, etc., cable length approx. 1,5 m, KERN KFF-A01, **€ 46,-**
- **Suitable printers** see page 177

Special equipment: Scales to meet Pre-packaging legislation

Pre-packaging legislation (FPVO)

This is anchored in the EC pre-packaging directive 76/211/EEC and serves as consumer protection within the framework of weights and measures laws when selling pre-packaged products commercially. It governs in detail the permitted tolerances (deviations) from the filling quantity stated on the sales label, as well as the quality of the verified balances being used for checking samples.

Pre-packaged products, which are produced and tested in accordance with pre-packaging legislation, carry the e symbol on their label.

Choosing the right verified checkweigher depends, on one hand, on the weighing range required and the largest permitted verification value in relation to the nominal quantity of the pre-packaged goods.

Nominal contents Q$_N$ of the pre-packed goods	largest permitted Verification Value [e]
≤ 10 g (ml)	0,1 g
from 10 g (ml) to ≤ 50 g (ml)	0,2 g
from 50 g (ml) to ≤ 150 g (ml)	0,5 g
from 150 g (ml) to ≤ 500 g (ml)	1,0 g
from 500 g (ml) to ≤ 2,5 kg (l)	2,0 g
from 2,5 kg (l) and more	5,0 g
from 10 kg (l) to ≤ 15 kg (l)	10 g
from 15 kg (l) to ≤ 25 kg (l)	20 g
from 25 kg (l) to ≤ 100 kg (l)	50 g

Volume values in ml or l are calculated using the weight and density of the liquid.

Order example:

The item to be checked is a pre-packaged product with a filling quantity of 250 g and an average tare value of 100 g. In accordance with the table above, a filling quantity of 250 g requires a checkweigher with a verification value [e] of maximum 1 g.

The right KERN product is either the **KERN FKTF 3K0.5LM** or the **FKTF 6K1LM**

Calibration periods for checkweighers: These are usually 1 year and are therefore shorter than the general re-verification periods in many European countries.

Sample testing of a pre-packaged item with an average tare value, e.g. the relative constant packaging weight is entered as a fixed value

Sample testing of a pre-packaged item with fluctuating packaging weight, such as glass containers, e.g. the tare weight is entered individually for each sample.

Sample testing of a pre-packaged item which is empty (destructive analysis)

Pre-packaged Products Control Scale KERN FKTF

Features

- **Touchscreen bench scale** with special software for testing, in accordance with weights and measures regulations, that the permitted error limits (minus deviations) have been observed, in accordance with pre-packaging legislation, and for production control and monitoring when filling pre-packaged items to a target weight.
- **The verifiable KERN FKTF** fulfills all the regulations of pre-packaging legislation. It has EC type approval which fulfils verification requirements, and which covers the special software for pre-packing legislation.
- **The special software for pre-packaging legislation in the KERN FKTF has two functions:**
a) When selling pre-packaged products, filling tolerances are regulated in verfication terms, in the interests of consumer protection. Here the software supports compliance with the verification regulations of the pre-packaging legislation during certified sampling tests using the automatically generated largest permitted negative deviation compared with a given target weight (LL 2).
b) In the area of food stuff production, when setting and adjusting the production facility for filling pre-packaged goods to a target weight, the software will automatically display the lower limit value (LL 1) below which the item is not permitted.
- **Statistical function** in the form of daily and weekly records, also with date/time, machine number and user statement. Graphic display is also possible.
- **Password protection** for secure manipulation of data which has been stored and collected

Technical data

- Backlit LCD graphic display with digit height 18 mm, screen diagonal 5.8" (approx. 147 mm)
- Weighing plate dimensions, stainless steel, WxD 340x240 mm
- Dimensions housing WxDxH 350x390x120 mm
- Optional battery operation, 6 x 1.5 V Size C not included, operating time up to 15 h
- Net weight approx. 6,5 kg
- Permissible ambient temperature 10 °C / 40 °C

Accessories

- **Protective working cover** over keyboard and housing, standard. Can be re-ordered, scope of delivery: 5 items, KERN FKB-A02S05, **€ 25,-**
- **Matrix needle printer,** to print the weights on normal paper, ideal for long-term archiving, KERN 911-013, **€ 330,-**
- **Suitable printers** see page 177
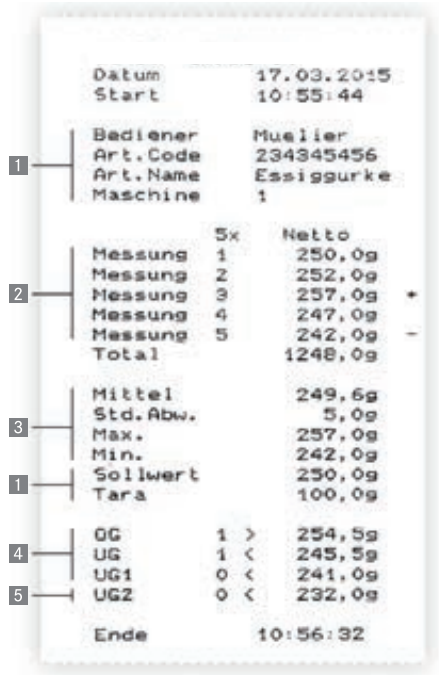

- **1** Operator, Item code, Item name, Machine, Filling quantity target value 250g, Average tare value 100g are entered using the touchscreen keypad
- **2** The measurements taken are captured and stored automatically
- **3** Average value, Standard deviation, Max. value, Min. value are calculated automatically
- **4** The upper/lower limit values (UL/LL) for setting and adjusting the production facility are stored by the machine operator in the pre-packaging legislation software of the checkweigher. In the course of checking pre-packaged items in accordance with pre-packaging legislation, please note that the value must not fall below the lower limit value LL 1 during production
- **5** The LL 2 value is the permitted lower limit in accordance with pre-packaging legislation for on-site sampling tests in accordance with weights and measures regulations.

ATEX – Safe weighing in potentially explosive atmospheres!

ATEX is derived from the French words for explosive atmosphere (**AT**mosphère **EX**plosible) and is a synonym for EU guidelines, for the quality and the use of equipment in hazardous industrial environments

ATEX balances were developed specifically for those areas where there is explosion danger, e.g. through handling of flammable substances, which are present in high con-centrations in the form of gas, mist, vapour or dust.

Typical fields of application are to be found, for example, in the crude oil processing industry, e.g. in all kinds of refineries. But also in the pharmaceutical or chemical industries, where you are processing oils, alcohols or Benzenes, in the manufacture of paints and lacquers, as well as in the cosmetics industry in the manufacture of alcohol-based cosmetics.

Note: Power supply to the ATEX scales is from a power source outside the explosion-proof area.

ATEX balances are divided into different protection classes, depending on the level of danger.

The KERN ATEX balances are permitted for the following protection classes:
Model KERN IEX: **II 2 G II B T4**
Model KERN OEX: **II 2 G II C T4**

II 2 G II B/C T4

Device group
II: Devices to be used outside the mining industry

Substance group
G: Gas

Temperature classes
T4: Max. surface temperature of the apparatus 135° Celsius
Ignition temperature of gas > 135° Celsius

Device category
2: Devices can be used in Zone 1. In this zone, it is expected that an explosive atmosphere will occur occasionally in normal operation.

Explosion class
II: Devices which are to be operated in the gas-air mixture.

KERN IEX
B: Ethylene (T2), municipal Gas supply (T1)

KERN OEX
C: the most hazardous class (e.g. Hydrogen (T1), Acetylene (T2)

Stocktaking scale with touchscreen for efficiently measuring beverage residuals in bottles and for transferring information to the PC

Features

- **Your advantage:** Less time consuming, compared with the measuring method used before
  - Up to now: Generally, the content of a bottle is established by a visual check, e.g. estimated, documented manually and then manually entered into the PC.
  - New with KERN SMT: Now you can easily select drinks and spirits by item name, item number, autolist or using a barcode scanner, then you can weigh the bottle, transfer the results to the PC - and stocktaking is done!
- **400 item memories** for master data such as item name, item description, PRE-TARE, e.g. weight of the empty bottle, max. bottle content in g, specific weight of liquid etc. The associated stock list can easily be generated at the PC
- **1 Easy entering of items at the PC:** An excel list with spirit bottles produced at a PC can be transferred to the balance using the software included as standard. Whether in the bar or in the warehouse, the spirits can be weighed in their bottles. In doing so, the stored bottle weight will be subtracted automatically.

After the stocktaking, the results will be transferred back to the PC where they can then be processed further as an Excel table
- Determination of beverage inventory according to an internal stock list
- **2 Selecting the spirit:** During stocktaking, the beverage to be registered can be selected using item name, item number, autolist or using a barcode scanner

Technical data

- Backlit LCD graphic display with digit height 13 mm, screen diagonal 4,3" (approx. 109 mm)

Balance Connection Software

For the direct transmission of weighing data to Windows applications (operating systems Windows XP, Vista, 7, 8, 10).
New: many additional applications, which will help to make the daily work with your balance easier.
- Transfer via RS-232, Bluetooth, LAN or WLAN (TCP/UDP/IP) to applications or files on the PC or in networks, e.g. to MS Excel, Access or Word
- Background transfer at the touch of a key or on a time-controlled basis
- Any output formatting of the transferred data is possible
- Any sequence, if applicable, calculations are possible, etc.)
- Automatic file-naming
- Recording of date and time for every value transferred

- Several output options (e.g. On-Screen display, Excel and file), is also possible simultaneously
- Parallel recording of data from several balances in a table simultaneously
- Large display of the latest recorded value on the display, for maximum transparency
- The interface protocols for KERN balances are already predefined
- Interface cable included. Please specify balance model when ordering (see interface cable table)

Benefits:
- Typing errors during e.g. manual transfer are avoided
- Automatic recording, e.g. for long-term tests
- GLP-compliant lab software

RS-232 / Bluetooth adapter

Adapter for the wireless connection of balances, force measuring devices etc. with an RS-232 interface to Bluetooth devices, such as Bluetooth printers (e.g. KERN YKC-01), tablets, laptops, Smartphones etc. In this way, where there is a physical separation or a large distance between the devices, the weighing data from one or several balances can be easily sent without cable and printed on a Bluetooth printer or transferred to a Bluetooth device (you would need the relevant software on the Bluetooth device, not included with the delivery). The compact adapter with its attractive design can usually be connected directly to the balance 1, e.g. an additional interface cable would not be necessary. Bluetooth adapter will be powered by the balance (if compatible) or with the mains adapter which is supplied as standard 2.
Range up to 100 m outside, depending on obstacles, such as, walls, the sensitivity and type of antenna of the receiver. Intersections of sending and receiving lines using the DCE/DTE switch 3. **Compatible with KERN BalanceConnection software.**
Scope of delivery: RS-232/Bluetooth adapter, mains adapter (EU/UK/USA/AUS/CH) 2, USB-A to Mini-USB-B cable 4, gender changer 5, driver CD.

Ioniser to neutralise electrostatic charge

Weighing items which are non-conductive, such as plastic, china, glass, etc often carry electrostatic charge. The electromagnetic field which then occurs between the items and the balance can cause the weighing result to be distorted by up to a gramme.

Therefore, when weighing in milligrammes or even smaller increments, we recommend neutralising the electrostatic charge with the KERN AC-Korona discharge ioniser.

With the mount, **1** conveniently next to the balance or you can manually direct it from all sides onto a particular weighing item **2**.

e.g. to control machines, plant, relays, signal lamps, valves etc., suitable for series KERN BBB, KEN-TM,

KERN KEN-A08**, € 600,-**

KERN KEN-A09

Profibus module

for integrating a KERN balance into a Profibus network, suitable for series KERN BBB, KEN-TM,

KERN KEN-A09**, € 250,-**

KERN KET-A02

Wall mount

to fit the display device (see Fig.), the display device can be fitted at two angles, dimensions WxDxH 135x148x110 mm, suitable for series KERN ILT-BM, ILT-GM, KET-TAM,

KERN KET-A02**, € 190,-**
(Display device is not included with the delivery)

KET-A05/KET-A08

Transponder card reader

RFID technology, dimensions WxDxH 133x30x98 mm, suitable for series KERN AET, BBB, BBN, CCP, CCT, ILT-BAM, ILT-GAM, ILT-NM, KET-TAM, KEN-TM, PET.
Scope of delivery: transponder card reader, interface cable for connecting to the digital I/O interface. Transponder cards are not included with the delivery.

KERN KET-A05**, € 450,-**

Transponder cards for transponder card reader KET-A05, pack of 10 pcs.,

KERN KET-A08**, € 65,-**

WE WEIGH ALMOST EVERYTHING ... AND THAT'S NOT ALL!

Microscopes and Refractometers

We offer you a complete, carefully-designed range of biological microscopes, stereo microscopes, metallurgical microscopes, polarisation microscopes as well as analogue and digital refractometers which are high-quality and highly-competitive in terms of price.

Comprehensive product details, high-quality materials, durability and ergonomic operation are all in line with the typical KERN "virtues" - quick delivery, large stocks, competent advice, comprehensive pre- and after sales service.

Your personal copy is ready and waiting for you – you can request it now, free of charge!

Medical Scales

For years an established name in doctors' surgeries, nursing homes, rehabilitation clinics and hospitals.

Wherever reliable quality is important, look no further than the complete KERN range of medical scales, from baby scales, to personal scales, chair scales, obesity scales through to hand grip dynamometers.

Request your personal copy!

SAUTER measuring technology

The SAUTER measuring technology range covers a large selection of force-measurement devices, measurement devices for coating thickness, material thickness, hardness measurement equipment (Shore, Leeb), calliper gauges, photometers, sound level meters and test benches.

Weights yesterday and today

Weights have always been used to carry out weighing procedures. This original purpose has almost disappeared. Today, weights are used almost exclusively for adjusting and testing = calibration of electronic balances. We therefore call them "Test weights" as this is their purpose of use.

Adjustment or calibration?

➔ *Adjusting* a balance means that you are intervening in the weighing system, to make sure that the display is set to show the correct nominal value. With ➔ *calibration* on the other hand, there is no intervention, you are testing whether the display is correct and documenting any deviation.

Testing, the right way!

The internationally valid OIML norm R111-2004 classifies test weights hierarchically in accuracy classes, where E1 is the most accurate and M3 is the least accurate weight class. With KERN you get the whole test weight range in all OIML accuracy classes E1, E2, F1, F2, M1, M2, M3.

As the appropriate test weight is only classed as checking equipment according to ➔ *ISO 9000ff* if it has the relevant proof of accuracy, all KERN test weights come with an appropriate ➔ *DAkkS-calibration certificate*. For further details, see the calibration service section on page 208.

KERN offers you the appropriate test weight package for your balance, consisting of the test weight, box and DAkkS-calibration certificate, as proof of its accuracy. The best pre-requisite for proper balance calibration.

➔ *See the glossary on page 214 – 216*

Test weights: classes of accuracy E, F, M and their general relation to the types of balances:

E1 Test weights for customers who require a high degree of accuracy for the most demanding applications. For high-resolution balances with d > 1,000,000 Use recommended with DAkkS calibration certificate only.

E2 Most accurate test weights for high resolution analytical balances of verification class I ≥ 100,000 e

F1 Test weights for analytical balances/precision balances for verification class I/II ≤ 100,000 e

F2 Test weights for precision balances of verification class II, ≤ 30,000 e

M1 Test weights for industrial and commercial scales of verification class III ≤ 10,000 e

Selection of the appropriate test weight for your balance

Correctly selected test weights with DAkkS calibration certificate are the pre-requisite for ensuring that your balances are not only correctly adjusted, but also correctly calibrated. Scheduled testing of your balances with such test weights helps to guarantee your quality requirements and to maintain your quality targets.

Here's how you find the right test weight for your balance:
A balance can never be more accurate than the test weight used to adjust it, it all depends on its tolerance.
Accuracy of the test weight: Should correspond to the readout [d] of the balance, or rather be better.

Nominal weight value: This is shown in adjust mode "CAL" in the balance display. Given a choice, the heaviest weight is the most suitable for accurate measurement.
Once accuracy and nominal weight value are specified, the suitable test weight is selected according to the tolerances "Tol" of the individual accuracy classes E2 – M3, see column "Tol ± mg" at the respective weight and table at page 190.

Example:
Balance with weighing range [Max] 2000 g = 2 kg
and readout [d] = 0,01 g = 10 mg

- The accuracy of the required test weight is determined by readout [d] with approx. ± 10 mg.

- Displayed weight size on "CAL" mode: 1000 g or 2000 g. The required test weight has a 2 kg weight size.

- Suitable test weights with ± 10 mg tolerance and 2 kg weight size, can be found in accuracy class F1. KERN-No 327-72, see page 195.

Exception, analytical balances (readout [d] ≤ 0,1 mg):
E1 test weights are recommended. Depending on the safety requirements, E2 test weights with a DAkkS calibration certificate will also be sufficient.

OIML norm R111-2004 for weights

The key points from the OIML norm R111-2004
OIML (Organisation Internationale de Metrologie Legale) has established the exact metrological requirements for weights in verified applications in approx. 100 states all over the world. The OIML recommendation R111 (2004 Edition) for weights relates to sizes 1 mg – 5000 kg. Statements are made on the accuracy, materials, geometric shape, marking and storage of the weights.

Error limits for weights of classes E1 to M3
The error limit classes are in fixed hierarchical levels in the proportion of 1:3, where E1 is the most accurate and M3 is the least accurate weight class. When testing weights with other weights, the correct test class is the next highest class.

Error limit classes (= tolerances)
The values given in the table below (tolerances ± ... mg) are the respective permitted fabrication tolerances. They are to be equal to the ➔ *measuring uncertainty* of the weight, if no ➔ *DAkkS calibration certificate* is available.

Conventional mass
The problem is the air buoyancy, which makes the weight appear lighter. In order to avoid this "distortion" in daily use, all weights are adjusted to the unit specifications as given in R111, e.g. it is accepted that: material density of the weights is 8000 kg/m^3, air density is 1.2 kg/m^3 and measuring temperature is 20 °C.

KERN cylindrical test weights
Comply with OIML R111-2004 in all respects, without exception.

You can create your own individual weight set yourself:
It contains only the weights which you need for testing purposes. KERN will customise your own personal box out of plastic, wood or aluminium. For more details on this, please see page 207.

Newton weights (N)

All hook and slotted weights as well as beam bars are available with N adjustment according to M1 tolerances, additional price € 8,–.
We need to know the location of use and postal code.
DAkkS calibration certificate for N weights: identical to DAkkS prices for individual weights M1, additional price € 8,–.

Cases/boxes for individual weight sets

Individual weight sets:
You can create your own "tailor-made" individual weight sets yourself. KERN will customise your own personal wooden box/plastic carrying case. The largest individual weight which will fit is given in the table.

Sample order:
Your individual weight set:
1 x 50 g, 2 x 100 g, 1 x 500 g, 2 x 1 kg, 1 x 2 kg.

The correct individual box is **KERN-Nr. 313-080-400** (plastic) or **KERN-Nr. 315-070-100** (wood).

Weight carriers for block weights or other test weights
Individual weight carriers for testing high capacity floor scales, pallet scales, pallet truck scales, crane scales, etc. This can also be used for storing the weights.
This means the weight container and the weights can be placed on the scale in one go, saving time and money.

The weight container can be calibrated to OIML accuracy classes M1 – M3.
On request, KERN will make you a "tailor-made" weight carrier to your specifications.

Example:

9 block weights	each 50 kg, class M1	=	450 kg
1 weight container	each 50 kg, class M1	=	50 kg
Total		=	500 kg

The Deutsche Akkreditierungsstelle GmbH (DAkkS) (German accreditation body)

The Deutsche Akkreditierungsstelle GmbH (DAkkS), successor of the German Calibration Service (DKD), is responsible for measuring "correctly" in accordance with legally binding international standards. It is part of DAkkS = Deutsche Akkreditierungstelle (German accreditation authority) which was founded in Germany. The basis is the European range of standards DIN EN ISO/IEC 17000 for conformity assessment, in particular the accreditation standard 17025, which governs the organisation of a calibration laboratory, as well as basic metrological technical requirements.

Only an accredited calibration laboratory can issue a DAkkS calibration (DKD) certificate. This defines not only the measuring method as well as the measuring result, but also gives information on tracing the test medium to national standards and the relevant uncertainty of measurement.

KERN – Precision is our business

The KERN calibration laboratory for electronic balances and weights has been DKD accredited since 1994 and today it is one of the most modern and best-equipped DAkkS calibration laboratories for balances, test weights and force measurement in Europe.

Thanks to the high level of automation, we can carry out DAkkS calibration (DKD) of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

Do you have any further requests or questions on this matter? We would be pleased to help you or visit us on the web at **www.kern-lab.com**

Range of services:

- DAkkS calibration (DKD) of balances with a maximum load of up to 50.000 kg
- DAkkS calibration (DKD) of weights in the range of 1 mg – 2.500 kg. Calibrations can be carried out in the following classes: E1, E2, F1, F2, M1, M2, M3
- Database supported management of checking equipment and reminding service

- In combination with periodic recalibration we can offer you a wide range of further services:
  - Reconditioning of weights, e.g. cast weights (sand blasting, painting, adjustment etc.)
  - Collection service with special transport packaging, even for heavy weights
  - Volume determination for weights of accuracy class E1
  - Measuring of sensitivity (magnetic characteristics)
- Calibration of force-measuring devices
- DAkkS calibration certificates in the following languages DE, GB, FR, IT, ES, NL

DAkkS calibration (DKD)

Why? DAkkS calibration (DKD) is always necessary when checking equipment (balance or test weight) is to be used in a QM process (e.g. to ISO 9000ff, GS 9000, TS 16949, VDA 6.1, FDA, GLP, GMP, GMP etc.)

What? Any checking equipment in proper condition can be DAkkS calibrated (DKD)

How? Determination of accuracy throughout the world by a laboratory which is accredited to DIN EN ISO 17025. Traceability to internationally recognised standards. The DAkkS calibration (DKD) certificate confirms both the measurement characteristics of the checking equipment and the general requirements for the control of checking equipment.

Where? Internationally recognised – this is monitored by ILAC (International Laboratory Accreditation Cooperation) and e.g. DAkkS (German calibration service) in Germany

When? Operator control the use of checking equipment and periodic recalibration time intervals themselves

The advantages of using the KERN in-house calibration

You send your balance to us.
Recommendable with new equipment and for balances which can be transported economically, as the travel costs for on-site calibration are then not applied.
On request, we can also provide a pick-up and collection service with our parcel service.

The advantages of using the KERN on-site calibration

We visit you.
In Germany, KERN has access to a comprehensive network of employees at the KERN DAkkS calibration laboratory, who can carry out on-site calibration of scales up to 50 t.
The calibration service is **independent of the brand.**
Preliminary maintenance work by agreement.
Prices for on-site calibration on request.

Recalibration

- The recalibration schedule depends on the frequency of use, the conditions of use and the safety requirements.
- We would recommend that you recalibrate your balances every 6 months if they are used intensively, and every 12 months with normal use.

Calibration of test weights

Calibrated measuring equipment requires calibrated checking equipment. For balances, these are calibrated test weights, also called "standard weights".

We calibrate test weights

- In all classes with permissible error limits E1 – M3 according to OIML R111-2004 (for tolerance tables, see page 190), in sizes 1 mg to 2500 kg.
- With free nominal value
- Newton (N)
- Independent of design (special designs)

The advantages of using the KERN in-house calibration

You send your test weights to us.
- Excellent price performance ratio
- The quickest processing time
  - DAkkS standard service: 4 working days
  - DAkkS express service: 48 hrs (new weights)
- The most modern calibration methods with robot controlled comparators allow the most accurate calibration results and fastest throughput time
- KERN DAkkS calibration certificates are internationally recognised
- A calibration service which is independent of the brand
- KERN also reconditions existing customer weights (e.g. cleaning or readjustment)
- On request, we can also provide a pick-up and collection service with our parcel service

The advantages of using the KERN on-site calibration

We visit you.
We would be pleased to visit you within Germany and carry out the calibration of your reference standards to OIML classes M1 – M3, 10 kg, 20 kg, 25 kg, 40 kg, 50 kg with permissible error limits, using our mobile MACOS system. Minimized downtime of your checking equipment and direct contact with our expert are the major benefits of this service. Price on request.

Recalibration

- The recalibration schedule depends on the frequency of use, the conditions of use and the safety requirements.
- In terms of standardisation, no particular recalibration interval is specified.
- We would recommend that you recalibrate your test weights every 6 months if they are used intensively, and every 12 months with normal use.
- We would be pleased to monitor your recalibration schedule.

Note:
For more information on this subject, please see our KERN DAkkS calibration service brochure – just request your free copy.

Glossary

A

Accuracy classes for test weights

E, F, M ➜ *Error limit classes*

Adjusting of measurement equipment

Precise setting of a measurement value via a professional intervention in the measurement system.

Adjusting the weighing range of a balance

`CAL INT` `CAL EXT`

Either with the external test weight via **the adjusting program CAL, or with the internal automatic adjustment resp. adjusting switch.** It is necessary with variations in temperature, a change of environmental conditions, change of location, etc. **Recommended as a daily check routine.**

Alibi memory

For weighings where verification is mandatory, and which are to be analysed and processed by a PC (e.g. printing out a packing list using a PC instead of a printer connected directly to the balance) electronic archiving is required by the metrological authorities by a verifiable data memory which cannot be manipulated.

Alibi memories from KERN fulfil this requirement. They are for paperless archiving of weighing results. For KERN products the alibi memory is fitted inside the balance, right between where the weight is determined and the output to the PC.

All data transferred to the PC is stored with date, time and all important weights for at least three months. These stored data strings can be displayed on the balance at any time. The data in the alibi memory can be deleted, but not changed.

Application accuracy

Allowance for measuring uncertainty during practical use of a balance. Is given in the appendix to the DKD calibration certificate.

ATEX

Derived from **AT**mosphère **EX**plosibles. (explosive atmosphere). A synonym for EU guidelines, which controls the quality and use of equipment in hazardous industrial environments, where there is explosion danger, e.g. by handling of flammable substances, which are present in high concentrations in the form of gas, mist, vapour or dust. See also 94/9/EC as well as 199/92/EC.

B

Balances which are verified/not approved for verification

Metrologically almost identical. For verified balances certain details are regulated by law, e.g. software changes and additional markings.

C

CAL

Adjusting the balance is triggered by using the CAL key on the key pad or on the touch display of the display device or the CAL menu option. This will guarantee the consistent high accuracy of the balance.

Calibration Certificate DKD/DAkkS

DAkkS

See product group 18 "Calibration service"

Calibration of measurement equipment:

determination of the precision of a measurement value without intervention in the measurement system. Example: to check a balance you load a ➜ *test weight upon it*. The term "Calibrating" was formerly also used for ➜ *Adjusting*.

Calibration or verification

DAkkS **M**

DAkkS-Calibration is possible for every balance in perfect condition. DAkkS calibration is a private service monitored by the state for ensuring high quality requirements according to ISO 9000ff and others, e.g. in production or research. **M Verifying** is only possible for type-approved balances marked with the green **M**

➜ *Verification*

Conformity assessment

Procedure for confirming warranted characteristics in accordance with recognised rules. For balances this relates to verification.

Conformity declaration from the manufacturer

The manufacturer declares that the product fulfils the applicable EU directives. With electronic balances this is always in conjunction with the CE mark.

Control of measuring equipment in the QM system in conjunction with quality standards

An organisation certified to a quality standard such as DIN/EN/ISO 9000 ff. e.g. a production plant is obliged to adhere to a defined quality standard within the framework of its quality management system. To do this, it is imperative to have a measurement equipment which is working accurately. DIN/EN/ISO 9001, December Edition 2008 states in section 7.6 "Guidance of monitoring and measurement equipment", that measurement equipment must be calibrated is defined intervals and before use. The measurement devices and measurement standards needed to do this must:
- be traced back to international or national standards. (➜ *Traceability to the National Standard*)
- their uncertainty of measurement must be known
- they must be marked with a clear identification

- the test must be documented

The ➜ *DAkkS calibration* fulfils all these requirements.

Conventional mass of weights

The problem is the air movement, which makes the weight appear lighter. In order to avoid this „distortion" in daily use, all weights are adjusted to the unit specifications given in R111, e.g. it is accepted that: material density of the weights is 8000 kg/m^3, air density is 1.2 kg/m^3 and measuring temperature is 20°C.

Counting resolution

The counting resolution is calculated in points from the ratio of the weighing range [Max] divided by the smallest part weight. It is a statement of counting accuracy.

D

DAkkS = German accreditation authority

See product group 18 "Calibration service"

Data interface

RS 232

To connect the balance to a printer, PC, network or a second balance. Typical interfaces are, for example, RS-232, RS-485, USB, Bluetooth, LAN, Digital I/O, DUAL, LAN etc. The interface parameters can be set using the balance. The interfaces available are stated in the model description.

Density determination

One of the main areas of application for laboratory balances is determining densities, e.g. determining the specific weight of liquids and solids. To do this you will need a highly accurate precision balance and a density set. It is particularly convenient if the balance can calculate and display the density right away. It has become apparent that by means of weigting when in the process of determining the density of liquids and solids according to the buoyancy method particularly accurate results can be obtained (Archimedes' principle).

Density determination of liquids:

By means of measuring the buoyancy with a glass plummet immersed in the liquid to be measured

Density determination of solid bodies::

The density is the ratio of weight [g] : Volume [cm^3]. The weight is derived by weighing the sample in air. The volume is determined from the buoyancy A = weight loss in [g] of a sample, which is submerged in a liquid. The density D [g/cm^3] of this liquid must be known. The volume [cm^3] is a result of A : D.

Applications:
a) Pre-packaged goods control, whenever a product is sold according to its volume [cm^3]. This volume is calculated with weight [g] : density [g/cm^3].

b) Materials analysis

c) Density of porous materials

For a more detailed version of the glossary, please refer to the website.

Glossary

DMS = Strain gauge

An electrical resistor strip that is glued to an elastic deforming body made of aluminium. As the strain gauge is mechanically deformed its resistance value changes, allowing the measured value to be calculated.

Draught shield

Required for balances with ➔ *Readout* d ≤ 1 mg, to avoid disturbing air movements.

Dual-range balance

As the load increases, the balance switches automatically to the next largest range, for both, weighing range [Max] as well as readout [d].

E

Error limit classes for test weights according to OIML R111

For further details, see product group 17 "Test weights"

F

FACTORY

These options can only be carried out at KERN factory.

FORCE = Electromagnetic force compensation

A counterforce is created by means of a coil in a permanent magnet. This counterforce is the same as the load of the weight being measured on the scale and therefore equalising. The measured value is calculated via the change in the coil current.

G

GLP = Good Laboratory Practice
➔ *ISO/GLP*

Gravitational acceleration
➔ *Gravitational force*

H

HACCP

= Hazard Analysis and Critical Control Points (HACCP)

The HACCP concept is a preventative system, which is designed to guarantee the safety of foodstuffs EC regulation 852/2004 mandates the use of the HACCP concept for all companies which are involved in production, processing and sales of foodstuffs.

I

ISO 9000ff/DIN EN ISO 9000ff

Quality Management System in the form of a DIN Norm for quality assurance in a factory.

ISO calibration/ISO certificate = factory calibration certificate

Testing measurement devices for accuracy in accordance with a procedure which is recognised, but not accredited.

ISO/GLP record keeping

Quality Assurance Systems demands record keeping of weighing results and correct adjusting of the balance, giving details of date, time and balance identification. The easiest way to obtain this documentation is by means of a connected printer.

J

Junction Box

For connection and simple corner adjustment of several load cells.

L

Linearity/precision

Greatest deviation of the weight displayed of a balance with regard to the value of the respective test weight in terms of plus and minus across the whole weighing range.

M

Minimum load [Min]

Lower limit of the verifiable weighing range. Is marked on the verification mark. The function of the balance is also given below the minimum load.

Minimum sample weight

Indicates the smallest weight which can be determined, depending on the process accuracy required.

N

Notified body

Neutral and independent, predominantly government bodies, which are formally appointed by the EC. They are engaged in the field of verification for conformity evaluations and type-approval test within the scope of type approvals.

O

Optimisation of reference weight (when piece counting)

See product group 08 "Counting balances/ Counting systems/Stocktaking scales".

P

Percentage determination

Example: Reference weight prior to drying: 50g = balance display 100%. After drying 40g = balance display 80% absolute (dry mass) or 20% relative (humidity).

Permissible ambient temperature

Measurement errors are possible with readings on either side of the limits. With verified balances this is stated on the identification plate.

PLU (Price Look Up)

This refers to a data memory in price-computing retail scales for the base price of sales items.

PRE-TARE

Entering and saving a tare weight (e.g. container weight) through weighing or manual entry using the balance keypad before the actual weighing process. When you subsequently place the tare container on the balance, the balance will show zero immediately - saves time. Particularly useful e.g. for checking fill levels

Pre-packaging legislation (FPVO)

Ensures that pre-packed goods are filled correctly, for example, in food industry. The Weights and Measures Act governs the permissible weight tolerances.

Proof of compatibility

This documents the verification compatibility for combinations of weighing modules such as display devices, load cells and connecting elements.

R

Readout [d]

Smallest readable weight increment on a digital display.

Recalibration

periodic checking of the precision of measurement equipment/checking equipment (e.g. balances/weights) to control accuracy,
➔ *Control of measurement equipment*

Reference weight (when piece counting)

See product group 08 "Counting balances/ Counting systems/Stocktaking scales".

Reproducibility (standard deviation)

sequenced measure of conformity in repeated weighing (e.g. balances) subject to the same conditions. Mostly 1 **d** or less. Quality feature.

Resolution of a balance

The resolution is calculated from the weighing range [Max] divided by the readout [d], z. B. [Max] 420 g : [d] 0.001 g = 420,000 points. The resolution is a quality feature - the higher, the better.

For a more detailed version of the glossary, please refer to the website.

Glossary   215

Glossary

S

SC-TECH = Single-Cell-Technology

➔ *FORCE.* The load cell consists of a single aluminium block, which gives a very high measurement quality.

Semi-micro balance

Analytical balance with a readout [d] = 0,01 mg

Smallest part weight when counting

The smallest piece weight, which a balance can accept for piece counting. For the relevant model, enter "g/piece" in the product data table.

T

Taring, automatic (PRE-TARE)

When the tare pan is put in place, the balance immediately displays zero.

Taring, subtractive

The available weighing range of a balance is reduced by the value of the tare load. Example: weighing range of a balance Max 6000g, Tare (= container) 470g, available weighing range 5530g.

Test weight, external (previously calibration weight)

for adjusting or checking the balance accuracy ➔ *Adjusting the weighing range*. The external test weight can be DAkkS calibrated at any time, even afterwards, see product group 18 "Calibration Service".

Test weight, internal

Like test weight external, but installed in the balance and powered.

T-FORK = Tuning fork principle

A resonating body (like a tuning fork) is electromagnetically excited, causing it to oscillate. The measured value is calculated via the change in frequency corresponding to the load of the weight being measured on the scale.

Totalising

Various individual weighings are added automatically to aggregate, e.g. all individual weighings of a batch.

Traceability to the National Standard

A pre-requisite for every perfect measurement is the validated comprehensive proof that the measuring equipment can be traced back to the international or national standards. In Germany the statutory binding standards are available from the PTB.

Type approval for balances

Strict process to test whether a balance fulfils the verification requirements. A balance can only be verified, if it has got a type approval from a notified body.

U

Uncertainty of measurement of a balance (= standard deviation)

Determined for each balance according to a precisely given test method and documented in the ➔ *Calibration certificate*. It depends on various factors, both, internal and external. Uncertainty of measurement increases by a rising charge of the balance, see product group 18 "Calibration Service"

V

Verification

Verification, in accordance with the new terminology "Conformity assessment". Only balances with ➔ *EC type approval* can be evaluated for conformity. These balances have an identification plate with the green ➔ **M**. Verification is stipulated by the state and serves as consumer protection.

According to the EU directive 2009/23/EG, balances must be verified if they are used as follows:

a) in commercial trade when the price of a commodity is determined by weighing.

b) in the manufacture of pharmaceuticals in pharmacies and analysis in pharmaceutical and medical laboratories.

c) for official purposes.

d) in the production of prepackaging.

e) in medical applications.

Every balance is tested by the metrological service and stamped with a verification mark. Its accuracy within the framework of permissible standard tolerances is thereby confirmed. EU verification applies to all member states of the EU.

Verification classes of balances

Class I – Analytical balance (precision balance), Class II – precision balance, Class III – industrial scale (commercial scale).

Verification of a balance with adjusting program CAL EXT

the adjusting program is sealed with an official mark after the verification. Thus the verification is only valid for the specific location of use.

➔ *Gravitational force*

For the preparation of verification it is therefore necessary to advise the location of use and postcode. See individual model details for the information as to whether verification can be carried out in the factory or at the location of use.

Verification of a balance with automatic internal adjusting CAL INT

the above restrictions in respect of the location of use do not apply, because the automatic internal adjusting works also after verification, therefore it is not sealed. In this case, verification does not depend on the location.

Verification validity for balances

Generally 2 years for all verification classes, for control balances generally 1 year, after expiry the balance has to be re-verified.

Verification value [e]

measure of the verification tolerance, depending on balance, mostly between 1 [d] and 10 [d]

➔ *Readout*

W

Weighing range [Max]

is the working range of the balance. The balance can be loaded up to the specified upper limit.
